Charlesville.—Pastures are not very
promising at present on account of the
drought which has prevailed for the last
three weeks. On account of the dry weather, there will be no more hay cut this
year than there was last. Some old meadows are not any better than good paster and worth cutting. Early
strain are not worth cutting. Early
strain are poor on account of want of moisture.

Corn is doing fine and is one of the most
promising cropp. Potatoes, 60e a but, 76e

Possibly no more picturesque scene is noticed as the traveller nears Montebello. Possibly no more picturesque seene is noticed as the traveller nears Montebello, Que. on the Sorth Shore C.P.R. line, than noticed as the traveller nears Montebello, Que. on the Sorth Shore C.P.R. line, than not the south side and the grim Laurentian mountains along the north, the intervening section being a steady rise, with an industrial control of the south of the pearance as well as being economical pro-

oers. the fall. The cream is sent to Montreal during the winter season, and the whole milk to the creamery during the sum-mer. The manager, D. Boden, began keeping milk records several years ago, and kept records until last year when the barn was burnt. Since that time things have been somwhat disorganized so that have been somwhat disorganized so that records fave not been kept during the past year. Now that the stock have cor-fortable quarters in their new stable, they will not only keep records but enter a number of the cow in the Record of Performance test. The new stable and barn is a model of

Of the Yorkshires there are usually 10 to 12 brood sows of the best strains kept here. They were originally of the Holywell strain crossed with the Oak Lodge that of the Holywell strain crossed with the Oak Lodge timported from the best herd in the Old Country. The present stock boar is from Cedar Lodge Royal 125%2.

A number of Clydesdale mares are kept A number of Clydesdale appendid class of draught horses. The Shetland ponies are of the best blood and make up that can be secured. Senator Owens will be pleased to have intending purchasers give him a soil.

What is The New System of Scientific Agriculture?

Nothing more than judgment and common sense shown in handling the soils of our western tracts so that the rainfall may be said for immediate absorption by the root filters of growing crops. It's a system that every farmer-lists, weis, North or Southers mydistally failing. It is a form that every farmer-lists, the system of the product of the said one called "Mald deserts."

Happy Frespects, Denver is rubbing it eyes, stirring itself in wonder, gasing in admiration at the great white-faced farm houses, broad-galed barns, bowing maples, pink-blossomed orchards, dairy farms, wheat and corn fields greet gladdened cyes at every angle. Campbell's "Soil Culture" is making wealth for Color for the said of the sai
