

Farmers

Should consult their own interests and purchase machines that are leaders, not those that are pushed upon the market by the glib tongues of agents, but those that have made a place for themselves by their own merits. **The**

SYLVESTER MACHINES

stand at the head by their merits.

The New Sylvester King Cultivator meets all requirements. It will do more hard work and do it better than any other **Cultivator** made. The Main Frame, Drag Bars and Teeth are strong. The shape of Teeth adapts them for going into hard land and going through stubble or rubbish without clogging. The extra height and space between the teeth enables you to work stubbles or soddy land without choking. By the use of a Tilting Lever the Cultivator can be made to work level at any depth. Three horses can handle this Cultivator with ease, and the Cultivator will run as light as any other at same depth of work. You can cultivate from 8 to 10 acres per day with two or three horses in sod, stubble or summer-fallow. It is the best machine in the world for summer-fallow and to kill twitch grass and other foul seeds. With the Ribbing Attachment you can drill up for turnips or carrots or plant potatoes. It is the best device in existence for preparing the land for winter.

Every farmer should have a **Dale Pivoted Land Roller**; 8 feet wide; steel drums 34-inch diameter; weighs 1,250 pounds.

If you are thinking of putting in power be sure and put in a **Gasoline Engine**. They are ahead of the windmill or any other for general farm work.

CAPITAL, \$100,000.

SHARES, \$20 each.

The Farmers' Mfg. & Supply Company, Ltd.

Are you a shareholder in the Farmers' Mfg. & Supply Co., Limited? If not, you should become one at once, and participate in the benefits of organization. We already have about 2,000 farmers who have learned of the value of association and of the added weight which co-operation for a set purpose brings by becoming shareholders in this practical Co-operative Co. What we do not manufacture we buy direct from the manufacturers, and do away with the middleman's profits, which profits do not add to the value of the article. You save from 15 to 40% on your household goods, implements, wire fence, and feed corn, etc. Last week we had three cars of feed corn go to some of our shareholders, and they saved 5c. per bushel. One shareholder got 300 bushels, and saved \$15. The benefits are too numerous to mention here. Write to Head Office.

THIS MODEL POULTRY PLANT

operated by the Columbia School of Poultry Culture, Waterville, N. Y., is covered with Paroid Roofing. Here is what they say about it: "We are sending you photograph of our buildings covered with your Paroid Roofing. This material is giving us excellent satisfaction and we are very glad to extend to you the privilege of using the illustration."

PAROID ROOFING

has no equal as a durable, economical roofing. Used by thousands of poultrymen and farmers for roofing and siding all classes of buildings. Any one can lay it. Light slate color—contains no tar, does not crack or run—does not taint rain water—keeps buildings warm and dry—water, heat, cold and gas proof.

Send for Free Samples and name of nearest dealer and investigate for yourself. For a 2 cent stamp we'll send new book of poultry house plans. **F. W. BIRD & SON, Makers, (Established 1817.)** Distributors of free roofing kit, fixtures for applying in every roll. HAMILTON, ONTARIO.

Mr Pig can't get through neither can Mrs. Cow.

FROST HOG AND CATTLE FENCE

is the ideal combination. The high carbon hard coiled steel wires form a regular "stone wall" against live stock. The Frost Locks, the biggest little things in the world, LOCK running wires and uprights without crimping or bending. There's no repair bill to pay—no cause for worry about cows in the corn or the pigs in the potato patch, when you have Frost Fences on your farm.

CLEVELAND, Ohio

This is the Sheet Metal Age.

The weakness of Metal Shingles heretofore, has been in the material and construction. Our "Sure Grip" Shingles overcome these defects as they are made of best galvanized steel, which has proved its worth for over fifty years. They grip tight, lie close, do not warp, rust, or wear out. Best roof made to-day.

Galt Sure Grip Shingles

It's in the Clamp

The lasting strength of a wire fence rests mainly in the clamp that secures the crossing wires.

The famous Anchor clamp has a grip that never fails. Bending the wires slightly, it keeps them fastened in the one place steadily, in spite of storm and pushing animals. It cannot slip. Nor can the wires spread. Made from one-inch steel—japanned or galvanized, the latter being proof against rust.

Anyone can put up an Anchor fence. But our agent will do it, if you like. There's no fencing so thoroughly satisfactory. Simple, reliable and wonderfully low priced.

Write for free catalogue showing pretty ornamental styles, also farm and garden gates.
