# A HAMILTON MAN SUICIDES

Fatal Aftermath of the A. E. Ames & Company Failure.

Mr. Jeffrey, Formerly Owner of the Hamilton Steam Laundry, Was Heavy Loser in Stocks, and Although He Had an Annuity of \$800 a Year Put a Bullet Through His Head-Accidents and Fatalities of a Bay.

Hamilton, June 30.—Joseph Jeffrey, one of the social lights of the city, and a man who was able to retire five years ago on his wealth, placed the muzzle of a revolver in his mouth yesterday morning and pulled the trigger. The bullet pass-ed through his head, came out behind his ear, and lodged in the ceiling. He fell forward and died a very short time afterwards. He did not go to the trouble of dressing, but sat on the edge of the bed and fired the shot. He died about 8.30. His friends hold the Ames failure in

Toronto responsible. His sister, who lived with him, knew that he was workying about money he had dropped on the stock market. He was in no danger of poverty, however, as he had an annuity of at least \$800, and owned some valuable property. He seemed to fear that through the loss of so much money he would lose his place in society, and his life of lux-

ury.

He was 59 years of age, and had never married. His brother, William, is a traveler for R. H. Macy & Co., New York, and Mrs. Surtees, Ottawa, is a sister.

#### " MAN'S FAITHFUL FRIEND."

Two Dogs Watched by the Drowned Body of Their Master.

Toronto, June 30.—Percy Kemp, a fourteen-year-old-son of James W. Kemp, who lived at the corner of Indian Road and Bloor street, started out on Sunday afternoon with his two pet dogs for a romp. As he did not return home several of his boy friends set out to search for him yesterday morning, and about a mile and a half from the mouth of the Humber they came across his two faithful dogs sitting on his clothes and a few feet away the body was found in three feet of water.

#### Killed at the Throttle.

Winnipeg, June 30.—An engineer named Stratton was killed at the throttle Saturday evening. While leaning out of his cab his head struck a projecting rock and fer miles strick a projecting rock and the inlies the train went on its way before the accident was noticed. A brakesman on the rear end saw Stratton projecting in from the eab window and went forward to investigate. It caused great excitement, and during the confusion the boys escaped.

# THE FREE HOSPITAL FOR CONSUMPTIVES

AN URGENT APPEAL FOR HELP.

TO THE EDITOR.

Dear Sir,-I take the liberty of soliciting your aid in raising funds for the maintenance of the Free Hospital for Consumptives. On account of our need, we find it necessary to make an urgent appeal to the public.

Permit me to state that the sum of \$150,000 has already been invested in the two Gravenhurst institutions and property just outside of Toronto on which to erect a home for advanced or incurable cases of consumption. The maintenance of the existing institutions necessitates an expenditure of over \$50,000 per annum, and to-day there is a debt of \$73,000, in the form of an overdraft, for which the Bank demands settlement, and so we need

Seven years ago, consumption was commonly believed to be incurable. The Toronto Globe, commenting editorially on our proposition to erect a consumptive sanatorium, said: "The consumptive is under sentence of death." It was soon shown, however, by the cures effected in the Muskoka Cottage Sanatorium, that a great field for useful work had been opened. But the demand for increased accommodation, and the cry for help from those who could not afford to pay, became so urgent, that the trustees decided to open a second home, which was located within a mile of the parent institution. Since we first began our work nearly eight hundred patients have been cared for; and the medical records show that of this number a large percentage have been completely cured, and others sent home so greatly improved that they were able to return to their regular work.

There is no other hospital for consumptives in Canada. The demands are, therefore, urgent. Our board of trustees, who had already given freely of their time and money, having faith that the people of Canada would come to their relief, and pressed by the urgency of the needs of the hospital, incurred this debt which must now be provided for. We have no endow ment, nor money with which to care for the large number of patients who are now in the hospital and not able to pay a single cent towards their maintenance and treatment.

In Canada alone 8,000 die of this disease annually, and it has been shown by experience and results of our work that the greater number of these could be saved, if promptly treated. One hope—the only hope—is in the philanthropy of our people and their knowledge of our needs, and we appeal to you to help us to make these needs so known that all may be impelled to help. Do not let those who cannot give large amounts feel they cannot help; all gifts are helpful.

I am, yours faithfully, W. J. GAGE.

P.S.-I forward a form of Subscription Blank which may be of convenience to your readers. Contributions, no matter how small, will be gratefully acknowledged by the writer, or Sir Wm. R. Meredith, Kt., Chief Justice, Toronto.

Dear Sir, I have pleasure in enclosing the sum of to the maintenance of the NEW FREE HOSPITAL FOR CON-SUMPTIVES.

THE TREATING HABIT.

It Costs Its Victims Many a Dollar

and Many a Pang.

Is it not a fact that men really spend in treating amounts that they would hesitate to give away no matter how deserving the charity? It is a trait of human character that comes through this all absorbing disposition to "hold your end up" when with a friend. Hundreds of men take thousands of drinks that they do not want, and other hundreds pay for thousands that are not

Two men meet, and one says: "Mighty glad to see you. Let's have something." Neither generally needs or even wants a drink. But the man who offers it wants to show that he is generous. He takes this method of proving that he is glad to meet his friend. The friend after he has taken the drink that he did not want, to prove that he, too, is a good fellow, insists upon a second

round. loon, taking a drink and paying for it and for no others if adopted in America would prove a blessing. The American custom of treating is decidedly curse. What we do for friendship's sake costs us many a dollar and many a pang.

How Oysters Grow.

A man who has devoted much time to the study of the oyster says that this bivalve is born with his shell on and that he grows only in the summer time. The beard of an oyster is not only his breathing organ—that is, his lungs but it also serves to convey food to his mouth. When the warm, calm days of June come the oyster opens his shell and by means of his beard begins buildand by means of his beard begins build-ing an additional story to his house. This he does by depositing very, very fine particles of carbonate of lime till at last they form a substance as thin as silver paper and exceedingly fragile. the new shell is as hard as the old shell.

# In the days of Louis XIV. even war-

riors bandied epigrams with one another. The Marechal de Grammont had taken a fortress by siege. "I will tell you a secret," said its military governor after surrendering.
"The reason of my capitulation was that I flad no more powder."

"And, secret for secret," returned

the marechal suavely, "the reason of my accepting it on such easy terms was that I had no more balls."

A Titred Kleptomaniac. A titled kleptomaniac of three quar-ters of a century ago was the Countess of Cork. She had a reputation for stealing anything she could lay her hands on, whether it was useful or valuable or not. Once, when leaving a country house where she had been staying, she saw and quietly picked up a hedgehog that was crossing a hall, a pet of the porter's, and took it away in her carriage. Finding it an un-comfortable foot warmer she decided to dispose of it at the first town where she changed horses and then offered it to a confectioner in return for a sponge cake.

What Meerschaum Really Is.

There is a very general impression in the minds of smokers that the meer-schaum part of the pipe, which they treasure so carefully and take so much pride and satisfaction in "coloring," is compressed sea foam. Such, however, is not the case. The German word meerschaum means in English foam of the sea, but its formation has nothing to do with the sea. It is a kind of clay, comes out of mines like coal and is
