Banker at a Confederate Gathering Explains His Lameness.

At the Confederate Veteran Camp's meeting recently, held at the Waldorf-Astoria, says the New York Sun, a group were exchanging recollections in one corner of the room before the speeches. One of the group, a man connected with a New York bank, was asked by a comrade where he was wounded, for the banker has a noticeable limp.

"My lameness is the result of a forgery," he replied.

"Bank episode, eh?" asked one. "No," was the reply. "Not exactly. I reckon I may as well satisfy your

Meaning of "The Hague."

Did you ever stop to ask yourself or your knowing friend the meaning of "The" in the place named The Hague? If you are looking for something that will knock the above-mentioned knowing friend off his feet, just ask him the significance of the three letters quoted. When he fails to answer the question, tell him that the The as it occurs in the instance cited is simply the Anglicized form of the Dutch word St. Gravenhaaz, or "S. Gravenhaze," either of which in the Dutch language means "the count's hedge" or "the count's grove" or "woods."

Originally, the site now occupied by the city of The Hague was hunting grounds of the courts of Helland about the year 1240 a palace was built in the grove. Presently a village sprang up around the palace still it was called "The Count's Hedge," and finally and lastly a large city which in the Dutch language has ts original signification, but which in modern parlance has been evoluted into "The Hague."—Montreal Witness.
