Price Movements on Wall Street Show Decided Trend to Irregularity.

Associated Press Despatch.

New York, May 14—Wall Street, 1:30
p.m.—Effective selling pressure against
Baldwin, which ran off 1½ points to
106%, a new low figure for the year, and
acute weakness in a variety of speciaties, caused a withdrawal of the support which had been extended to the
popular industrials in the early dealings, and the whole market dipped.

American Can and United States Cast
Iron Pipe were supplied freely, also
General Electric, United States Rubber
first preferred, Central Leather preferred, and Associated Drygoods.
Philadelphia and Reading Coal and Iron,
however, continued to creep up, touching 47.

Associated Press Despatch.

New York, May 14—Wall Street, noon.
—After the first batch of over-night buying and selfing orders had been disposed of, trading quieted down, with price movements showing considerable irregularity. Chief activity centered in the rail and coal shares, Philadelphia and Reading Coal extending its gain to 3 points and Lohigh Valley and Reading Christis each moving up 1½. Illinois Central also was pushed up a point. Early heaviness of Chesapeake and Ohio was attributed to speculative disappointment over the failure of the directors to increase the regular dividend. Punta Alegre and South Porto Rican Sugar extended their losses to 2 points. Maxwell A and United States Rubber first preferred also dropped a point or so. Call money opened at 3½ per cent.

there was nothing going on. After opening firm, prices had relatively steadied throughout the session and closed 3%c higher for May and July and 1%c up for October. Seaboard advices estimated yesterday's sales of Manitoba wheat at 300,000, but there was not much doing this morning, as bids still continue to curtail new business for the time being.
