

## A Sign of the Times

PEOPLE are becoming very careful about what they eat and drink—  
The preference for goods in sealed packages—especially in food stuffs—is now quite definite and becoming more so every day.

We must frankly admit that there are sound reasons for this preference. Food stuffs cannot be exposed to varying atmospheric conditions without losing both strength and flavor.

Tea—of all articles of everyday diet (excepting coffee, perhaps) needs protection most, and best merchants have been quick to appreciate the fact. So much is this the case that the selling of loose Tea in bulk will soon be a thing of the past.

RED ROSE TEA reaches you with all its virginal flavor, strength and purity—  
—It is sealed in air-tight packages—dust and damp-proof—

RED ROSE is a blend of the best Indian and Ceylon Teas.

—The former assures generous strength and richness—the latter that coaxing, delicate flavor, Qualities for which Red Rose Tea is famed.

Ask your Grocer for the 40c. package of Red Rose and you'll get better Tea—Tea that spends farther—for the same money.

You want "Good" Tea—well,

"Red Rose Tea is Good Tea"

## NOTICE OF MOTION BY MR. LABILLOIS

Regulation of Automobiles on  
Public Roads is  
Desired.

WILL COME UP TUESDAY

Hon. Chas. H. LaBillois gave notice of the following motion for Tuesday next.

(1) WHEREAS, the whole question of rural social conditions is so connected with agricultural development that some of the various conditions which contribute to the amelioration of the social as well as business difficulties and the isolation of country life must be considered.

(2) WHEREAS, the pleasure and remuneration that the large majority of our farmers derive is by going themselves to market, carrying produce with their own teams and in a great many cases they are accompanied by their wives and daughters and,

(3) WHEREAS, the reckless running of automobiles upon country roads is a serious menace to the lives, limbs and property of the people, who have to drive horses thereon and upon some highways the farmers and his family are seriously inconvenienced, and

(4) WHEREAS, in a great many cases the people are so afraid to drive to different stores in country parishes, villages and towns, or to railway stations for fear of meeting automobiles, that they send their money to the department stores of Toronto, Montreal, etc., depriving the merchants of our province from receiving thousands of dollars which will result in driving many business men to the West.

(5) WHEREAS, it is necessary in order that the farmers who are the backbone of our province should be protected in the enjoyment of country life and that their families be placed in a position of security and safety while travelling on our highways.

THHEREFORE RESOLVED, that in the opinion of this House, the Government should introduce Legislation providing that during one day of the week (not Sunday) no motor vehicle or automobile be allowed to travel on the public highways of New Brunswick except in Incorporated cities and in the case of a doctor or clergyman being called hurriedly to the bedside of a sick person, who either by accident or illness requires the services of a specialist or medical doctor or the spiritual visit of a clergyman of any denomination.

those who believed that the votes of all citizens were of equal value. As an example he thought that the vote of the Prime Minister of the Province was worth more than that of any ordinary individual. He was not an admirer of universal suffrage.

## STOP THAT ITCH!

I Stop That Itch in Two Seconds with D. D. D.

No remedy that I have ever sold for Eczema, Psoriasis, and all other diseases of the skin has given more thorough satisfaction than D. D. D. Prescription for Eczema.

A. McDonald, Druggist.

## FLIGHT TO EUROPE

Possible for the Aviator to Alight on Land or Sea if His Engine Stops.

Pontons of an entirely new type, which can be inflated or deflated and attached to an specially-designed aeroplane that will fly over land or sea, have been patented by Harry N. Atwood, of Lynn, Mass.

The invention, devoted to flying say, promises to revolutionize the art. With his improved type of pontons and other attachments, which will be added to a machine he is designing, Atwood's projected flight to Europe seems certain.

According to the young aviator, but one other improvement is necessary to ensure absolute safety on a long flight such as that proposed. It is an engine which can be started without the assistance of anyone. The new engine would have to be one which could be started at a moment's notice by the aviator, without moving from his seat. Atwood has told friends that he has ideas along this line, which he will develop just as soon as his latest invention is thoroughly tested.

The new pontons are very simple in structure. With them it will be possible for an aviator to make a landing on land or sea in case his engine stops.

They are constructed of one-eighth inch rubber over a light framework of fabric, which gives them shape. Despite their frailness these pontons, Atwood declares, will stand up in any sort of sea, or wind.

## PLOWMEN'S WORK BASIC

Good Tillage Essential to Advancement—Federal Aid Sought.

"If there is to be the forward movement in agriculture that is talked of as necessary in this province, the foundation of it must be a proper cultivation of the soil," declared Mr. J. Lockie Wilson, Superintendent of Agriculture and Horticultural Societies. Mr. Wilson was hopeful of considerable revival of interest in the matches of the Ontario Plowmen's Association, which will hold its annual meeting on February 2 in the Toronto City Hall. The association gets a grant of \$260 a year from the Ontario Government and has asked the Dominion to grant a sum of not exceeding \$3,000 to each of the nine provinces for the encouragement of agriculture along this line. Very favorable replies had been received to such a request from the Liberal Government, but owing to the change at Ottawa it has been necessary to renew the request.

## ONE MAN ONE VOTE IN QUEBEC

Bill Finally Passed—Males  
Over 21 Allowed  
to Vote.

The "One man one vote" bill was finally passed in the Legislative Council last Friday, when it was read the third time on division. Hon. Mr. Chapais dissenting.

By the new law suffrage is practically given to every British subject in the Province of Quebec over twenty-one years of age, and while a considerable number of votes will be removed by the new system, it will on the other hand serve to add a thousand more to the list of voters.

By the new bill the right of suffrage is given as follows:

To any owner of property, lessee or sub-lessee of property, of any value whatever.

To any son, stepson, or grandson of an owner, lessee or sub-lessee of property.

To all laborers or tradesmen providing they receive a salary of at least \$120 a year.

To all clergymen irrespective of denomination, and without any other qualification.

To all engaged in the teaching profession, irrespective of salary. The only restriction is that the voter must be a British subject, male, and must be twenty-one years or over.

There is no limit of time made for residence or ownership of property.

The new measure is about the nearest step to universal suffrage, and will entirely revolutionize the old system of suffrage, in the Province of Quebec.

Hon. Mr. Chapais characterized the measure as a regrettable innovation, and he pointed out that many years ago when Sir J. Macdonald had a bill passed at Ottawa giving the right of vote to the sons of proprietors he had differed in opinion with his chief. He had always considered, and he was still of the opinion that it was a bad policy to annul the vote of the head of a family by that of a son, who has less experience and less interest in public affairs. Since that time suffrage had been further extended, and that the present measure meant practically universal suffrage.

Mr. Chapais declared that he was for equality, but he was not one of

## Such Styles As These Prove The Fit-Reform Leadership

THEY are more than correct—they are individual and distinctive.

Fit-Reform is the only high grade tailoring organization in Canada having designers and tailors able to create such styles.

Each season, Fit-Reform's position grows stronger as the Fit-Reform standard grows higher.

We have just placed in the Wardrobe some new patterns in Spring Suits, in both the styles shown above. The fabrics are fine Worsteds, Tweeds, Serges and Homespuns—the prices, from \$20. up.
