All the Fault of the Magnies

I was one day returning from s drive when I came upon a solitary magpie sitting on a tree. It preceded me to settle on two trees in succession along the drive, and then flew away. Shortly afterward three coincidences happened—first, a picture fell down; second, about half a ton of thick plas-ter fell from a ceiling in a room close to the dining room while dinner was in progress; third, the hot water boiler burst and a new one had to be put in I make no remarks upon these curious coincidences, but it is a fact that they happened.

Three years ago I was on a motor car tour in Cornwall. One day I saw a magple and had a bad puncture with in an hour. Two days afterward, seeing another single magpie, I had a broken exhaust spring. The next day, I think, I saw another single magpie. I said to my cousin who was with me, "I wonder what is going to happen this time." The words were hardly out of my mouth before one of my driving chains broke and flew off the sprocket, fortunately without harm .-Country Life.

Presence of Mind.
Presence of mind is a quality much talked of, much honored and little cul-tivated. Yet, like most other good things in the world, it requires cultivation to bring it to any egree of per-fection, for in very sew cases is it a natural gift. Some people there are doubtless to whom it comes naturally and by instinct to do the right things at the right time and place, but they are few in number. Then, again, some people are by nature cooler headed than their neighbors and do not shout or otherwise become useless just when their services are required. But this quiet composure, though very valuable, s not quite the same thing as presence of mind. The latter consist not only in having your wits ready for use, but in knowing how to use them and being sufficiently calm and steady in mind to remember and turn to account that knowledge. From the earliest possi-ble age children should be taught self centrol and the instinct of trying to remedy any mistake or accident they

Too Late. "Madam," said the grateful census enumerator, "you have replied courteously and kindly to all my questions. Unlike nearly every person I have met since I began this work, you have not treated me as if I were an enemy and an intruder. You have answered satisfactorily all the questions as to age, physical condition and ownership of property. Your conduct meets my hearty approval not only as a government officer, but as a citizen, and, with your permission, I will ask you a question hot down in my list. Are you

engaged to be married to anybody?"
"I am. sir," replied the handsome widow, blushing and smiling. "I feared so," said the census taker, with a sigh. And he put on his hat and went out into the cold world again,

his faith in human nature restored, but his heart broken.

Japanese Swords. "Japanese swords are the finest," said a swordmaker. "They are finer than the blades of Ferrara, of Toledo or of Damascus. The blades of Ferrara, of Toledo and of Damascus must bend into a perfect circle without breaking, and, a pillow of down being thrown in the air, they must cut it in two with one clean stroke, but the Japanese blade must do all that and more. The final test of a Japanese blade is its suspension, edge upward, beneath a tree. It must hang beneath the tree for twenty-four hours, and every lightest leaf that falls upon its edge must be severed neatly. One failure and back to the forge goes the Japanese blade again."

Envious Canada. There is a great deal of gush about the charming and all conquering American girl. What is the truth about this much lauded damsel? The most attractive American is she who is educated abroad, who imitates the voice of the Englishwoman and the dress of the Frenchwoman and who uses the money accruing from Chicago pork or New York stocks to buy, so far as such things may be bought, the old world graces of speech and attire.

A Japanese Proverb. A Japanese proverb worth remember-

"He who knows not and knows not that he knows not is a fool. Shun him. "He who knows not and knows that he knows not is humble. Teach him. "He who knows and knows not that he knows is asleep. Wake him.

"He who knows and knows that he knows is a wise man. Follow him."

"I am greatly troubled with kleptomania," exclaimed the fashionably dressed woman as she bustled into the drug department. "Now, what would you advise me to take for it?" "Your departure, madam, by all means," replied the floorwalker, and

S. E., THOMPSON,

BY-LAW NO. 2, 1906.

A By-law to repair the drain from lot 12, in Township of Warwick, westward to out-let, along the Boundary line between the Township of Brooke and Warwick, in the County of Lambton.

Whereas complaint has been made to the Municipal Council of the Township of Warwick by residents of said Township that the ditch or drain along the Boundary line between said Township and the Township of Brooke is out of repair.

And whereas said ditch or drain was critically constructed and improved partly

And whereas said ditch or drain was originally constructed and improved partly by funds of both Townships interested, and partly by statute labor and subscriptions. The parties benefitted.

And whereas the said Council of the Township of Warwick acting under Section 76 of the Municipal Drainage Act, has procured an examination to be made by C. A. Jones, Esq., D. L. S., being a person competer for such purpose of the ditch or drain p. Toposed to be repaired and of the lands and roads liable to assessment under the "Munic." all Drainage Act," and has also drain roposed to be repaired and of the lands and, roads liable to assessment under the "Munfo," all Drainage Act" and has also procured plan, specifications and estimates of the drainage work to be made by the said C. A. Jones, Band, and an assessment to be made by him of be lands and roads to be benefitted by such drainage work and of be benefitted by such drainage work and of other lands and roads liable. For contribution thereto, stating as nearly as he can the proportion of benefit, outlet lie by and injuring liability, which, he sis of well in the said assessment so made being the assessment bereinaster by this By law enacted to be assessed and levied upon the roads and lots or parts of lots hereinaster in that behalf specially set forth and described and the report of the said C. A. Jones, Esq., in respect thereof and of the said drainage work being as follows:

Petroles Ian 16th 1006

wick
GENTLEMEN —In compliance with instructions received from your Honorable Body II have made an examination of the drain on the Townline between the Township of Warwick and Brooke in front of Lots 3 to 11 inclusive of Warwick and extending a short distance in on to Lot No. 2 of the same township, with a view to repairing and improving the said drain to be known hereafter as the "McGill Drain."

I learned that this drain has been constructed and repaired by various means such as statute labor, private contributions, grants ont of general functions of the said of the system of levels so that in some places it is quite a large drain and in others quite small and insufficient to prevent if overflowing and flooding in times of freshet.

I consider it would have been better, had the upper portion of this drain not been carried so far west along the highway without allowing it to follow more closely the natural trend of the water as it has necessitated cutting through a couple of pronounced ridges, one near the 9-to side road of Brooke, whereas had the drain at some point a little east of each of these ridges been carried southerly or south-westerly these deep cuts which are objectionable, particularly on the highway would have been avoided, and this drain from a point near the 6-7 side road of Brooke could have continued westerly along the highway to its present outlet without any serious objection. However as these cuts are already made and only require a little deepening for the efficient working of the drain in have made and only require a little deepening for the efficient working of the drain in have made and change of outlet or location for the present own posed repair and improving as in its present outlet on its uot capable of carrying the waters brought to it by the Leach award drain and other private drains and J have included this in my scheme for the proposed work and have designated the drains as "Main Drain and clearly side of the townline opposite the drain enters upon the highway from said lot vecto

where it enters the Main Drain at station 113½ on same where, as above mentioned, it crosses from the south to the north side of the highway. This makes a total of 1292 rods in both.

The culverts across the townline at stations 53½ and 113½ are both in good condition and being comparatively hew ones and of sufficient size will not require any work done on them, the one opposite the 6-7 side road of Warwick is in very fair condition and wide enough, but the covering is about a foot too low and will require to be raised.

In my estimate of the cost of the proposed work, I have not included the construction or repair of any of the culverts or bridges over the drain leading from the private land to the highway as all the parties, either prefer or sive agreeable to build or repair their own bridge or culvert and I have kept this fact in view in making my assessment on the lands affected for the cost of the work. There should, however, be a certain uniformity in these bridges or culverts and I would recommend that where they are built with posts and stringers they conform to the following regulations, viz:—

St. o to 52 they be at least 5 ft. wide and 3½ ft

St. 0 to 52 they be at least 5 ft. wide and 3½ ft high in clear.
St 52 to 114 they be at least 6 ft wide and 3½ ft high in clear. nign in clear. St 114 to 154 they be at least 7 ft wide and 3½ high in clear. St 254 to 276 they be at least 8 ft wide and 3½ ft high in clear

St 15a to 276 they be at least 8 ft wide and 3½ ft high in clear.

Should they be built with long stringers resting on the ground at the edge of the drain, the ends of the stringers should project at least 2 ft beyond the edge of the drain and the underside of the stringers be at least 3 ft 9 in above the bottom of the drain.

Many of the present bridges 1 find are even larger than the minimum 1 have specified particularly in the lower portion while some of them at the upper end are smaller, but where they are new they might be left for a time to test whether or not they are capable of carrying the water. The one at st. 179 opposite the west ½ lot 6 is a comparatively new one but is about a foot too low and should be raised and the one at st. 1792 opposite the east ½ lot 5 is also too low and if not replaced with a new one should at least be raised to the required height.

I have prepared plans, profiles and specifications of the proposed work and schedule of assessment on the lands affected all in duplicate; one copy being for service on the Township of Brooke and all of which I herewith submit

SCHEDULE OF ASSESSMENT. Warwick Township

Total Assessment, Brooke and Warwick \$1018.00 SPECIFICATIONS

SPECIFICATIONS

The drain is to be dug to the depths and dimensions shown and figured on the accompanying profile with sides sloped 1 horizontal to a vertical and the bottom an even grade between stations.

The finished depth of the ditch is to be measured from the ground beside the stake on the side next the drain.

Should any error appear in the figured depth at any stake the grade of the bottom is to be made to conform with that shown on the profile. From st o to 276 on the Main Drain and 9 to 32 on the Branch, all the earth is to be cast between the drain and the fence and evenly spread, at least 3f clear of the edge of the drain when practicable. From st 276 to 282 on the Main Drain when practicable, From st 276 to 282 on the Main Drain the earth is to be cast about equally on each side of the drain and from 282 to 292 it is to be placed in the lowest ground, filling the old channel where it is abankoned by the new course of the drain.

The covering of the bridge or culvert opposite the 6-7 sideroad of Warwick is to be raised 1 foot and made perfectly solid again.

All the work to be done to the entire satisfaction of the Commissioner in charge of the work.

I have the honor to remain.

**C. A. JONES, O. L. S. & C. E.
