

T WILL PAY YOU

Try Zam-Buk for that chronic
ulcer from which you are
suffering. This herbal balm has
cured many such cases when every
other treatment failed.
J. Dubois, of Imperial St., Van-
couver, can verify this. Her
mother writes: "Mother had such
a sore on her feet that she was un-
able to walk. She had doctors
and treatment, but nothing
helped her any good, and we were
nearly to think she would never
be well, when a friend advised her
to use Zam-Buk. She did so, and
in a few days the sore was healed.
She was able to walk without pain. She
has used Zam-Buk until
the sore was completely healed,
and has not known a moment's
discomfort since."
Zam-Buk is equally good for
burns, scalds, cuts, and all
injuries. All druggists 50c.
per box, or from Zam-Buk
Toronto, for price. Send 1c.

Neighborhood Improvement Begins at Home

A good neighborhood is merely a collection of good homes. Stop wishing for a better neighborhood—do your duty by painting your home, and planting grass and flowers. Your example will set your neighbors thinking. Before you realize it the home improvement idea will be sweeping through the whole community. Set the home improvement example in your neighborhood, by painting your house with

Low's Prother's HIGH STANDARD LIQUID PAINT

You can always depend upon "High Standard" paint for best results because it is scientifically made of chemically tested ingredients, blended together by the most efficient machinery. It holds tight to the wood in perfectly protecting coats—keeps its color—stands sun, wind and wet for years—falls only by gradual wear—and leaves a good surface for repainting. It's economy to use this better paint. Your painter can put it on in less time. It goes so much farther and lasts so much longer.

While the house and its surroundings are being beautified, improve the inside, too. For the walls and ceiling use

Low's Prother's Mellotone

Colors are "soft as the rainbow tints." It delights as well as rests the eyes. It is wonderfully durable as well as artistic. Mellotone is fadeless and washable—not easily scratched or marred.

Iron in the Ocean.

A piece of iron will sink to the bottom no matter how deep the water is, because water is only slightly compressible. If water were highly compressible, as air is, the water at a great depth would be much denser and therefore heavier, and an object would sink until it reached a point at which its weight would be less than that of the water which it displaced, and there it would float, as clouds float in the atmosphere. But a cubic foot of iron weighs more than a cubic foot of water at a depth of two miles, just as it does at the surface, and therefore continues sinking until it reaches the bottom.—Christian Herald.

Clever Fish Hawks.

Turks around the Bosphorus amuse themselves by playing pitch and catch with the hungry fish hawks. They throw high in the air a lump of raw meat, and the hawks pounce upon the meat before it strikes the ground and make away with it to the little ones.

A Short Christmas.

"Christmas day is only three hours long in the Finnish town of Tornea," said a traveler. "I spent last Christmas there. At sunrise I got up to see my presents and to read my Christmas mail and night had fallen before I got through breakfast"—Exchange.

Cynical.

Some cheap people expect St. Peter to pass them through the pearly gates because they once paid 50 cents for a fifteen cent supper at a church social.

Just Like Relatives.

"Are Belle and Barbara blood relations?"
"Oh, no. It is a purely platonic ground they have for each other."

Pessimism.

Pessimism may be defined as that form of restricted mental vision that causes men to anticipate evils that do not happen.

The Balkan States.

The countries known as "the Balkan states" occupy the Balkan peninsula, the easternmost of the three great southern peninsulas of Europe, which in its turn takes its name from the mountain range of the Balkan. This great mountain chain, running down into the peninsula, is a continuation of the southern Carpathians or Transylvania Alps. The strict limits of the Balkan peninsula place its base on a line from the delta of the Danube to the head of the Adriatic sea, but part of the territory thus defined lies outside what is conventionally designated as the Balkan peninsula.

Had Done Her Part.

The express was approaching a railway bridge that spanned a deep river, and a stout old lady in one of the compartments showed signs of nervousness. As the train went roaring across the structure she did not speak a word, but seemed to be holding her breath. "There," said a gentleman in a neighboring seat, "we are over it safely." The old lady heaved an explosive sigh. "Well," she said, "if we had gone to the bottom I should have died with a clear conscience, for it wouldn't have been my weight that did it. I bore up so that I really made the train lighter than it would have been without me!"

MOTHER TELLS HOW VINOL

Made Her Delicate Boy Strong
New York City.—"My little boy was in a very weak, delicate condition as a result of gastritis and the measles and there seemed no hope of saving his life. The doctor prescribed cod liver oil but he could not take it. I decided to try Vinol—and with splendid results. It seemed to agree with him so that now he is a strong healthy boy."—Mrs. THOMAS FITZGERALD, 1090 Park Ave., N. Y. City.
We guarantee Vinol, our delicious cod liver and iron tonic, for run-down conditions, chronic coughs, colds and bronchitis.

VICTORIA'S LETTERS.

Royal Secrets That Are Stored Away In Buckingham Palace.

"We may wonder if the world will ever be allowed to see the private correspondence amassed by the late Queen Victoria," says a writer. It is stored away in a strong room built into the walls of Buckingham palace, and the queen shared her confidence with no one.

So long as she was physically able to do so she opened and closed the safe herself and arranged its contents. When she was too feeble to do this she employed an old and trusted secretary, but even he had to work under the royal eye. He was never allowed to keep the keys nor to read the letters that he handled.

Queen Victoria was always a voluminous letter writer, and she was in constant communication with most of the royalties in Europe. Every domestic secret and privacy of royalty during half a century is said to be represented by the contents of this wonderful safe, and it is easy to believe that the modern historian would find his hands full if he were permitted to browse among these letters.

But probably he will have to wait a few hundred years, and then his popular audience will be a languid one. It is one of the ironies of life that we can never have a thing when we want it.

Ancient Use of a Kiss.

A Roman woman in the ancient time was not allowed to drink wine except it were simple raisin wine, and, however she might relish strong drinks, she could not indulge even by stealth—first, because she was never intrusted with the key of the wine cellar and, second, because she was obliged daily to greet with a kiss all her own as well as her husband's male representatives, down even to second cousins, and as she knew not when or where she might meet them she was forced to be wary and abstain altogether, for had she tasted but a drop the smell would have betrayed her. So strict were the old Romans in this respect that a certain Ignatius Mercurius is said to have slain his wife because he caught her at the wine cask—a punishment which was not deemed excessive by Romulus, who absolved the husband of the crime of murder.

Beefsteak Smothered In Tomatoes.

Some day when the oven is being used for other cooking plan to have for dinner round or planked steak cooked with tomatoes, and for this dish either fresh or canned ones can be utilized. Place the steak in a slightly greased baking pan which has a close fitting cover. Cover it with tomatoes, sliced if fresh or just turned out of the can if canned. Add also one small onion coarsely chopped and a small piece of bay leaf, together with salt and pepper. Cover the whole closely and cook for an hour and a half without removing the cover of the baking dish. Add no water, as the tomatoes are moist enough.

Preparation of Parchment.

Parchment is the skin of sheep or other animals prepared in sheets to render them fit for being written upon. The heavier parchment, used for drumheads, is made from the skins of asses, older calves, wolves and goats. All these are similarly prepared. The skin, being freed from the hair, is placed in a lime pit to cleanse it from fat. The pit is then stretched upon a frame, and care being taken that the surface is free from wrinkles. The flesh is pared off with a circular knife, after which it is moistened and whitening spread over it. Then the workman, with a large pumice stone, rubs the skin. He next goes over it with an iron instrument and rubs it carefully with pumice stone without chalk. Finally the skin is gradually dried, tightening being occasionally required.

To Lengthen Life of Necktie.

A good many people who are users of four-in-hand ties are more or less bothered by the tie's becoming useless after it has been worn a few times. Take the wide end of the tie with seam up and lay it flat upon a table. Then thrust in the finger and seize the lining. Take the silk cover in the other hand and pull it over the lining, about half of its length. A hot iron is then run over the lining to straighten it out.—Popular Science Monthly.

Home Grown Oats Best.

The Maine agricultural experiment station has by its wide studies of inheritance in oats proved the idea current among farmers that foreign grown seed is better than home grown to have little basis. As the Journal of Heredity notes, a variety frequently behaves much better after it has been acclimated for a year or two.

In the Spring Is It a Cough?

Ontario Women's Advice.

Hamilton, Ont.—"I am a great believer in Dr. Pierce's medicines. I am speaking from the actual use of them and the great benefit I have derived therefrom. Shortly after my marriage I began ailing, had a very bad cough and got very thin and was run down. My people thought I was going into a decline. They got Dr. Pierce's 'Golden Medical Discovery' and this medicine completely cured me."—Mrs. ADELLA HIBBARD, 26 Cheever St., Kilbride, Ont.

"When I was only eleven months old my mother recovered 'Golden Medical Discovery' for me. I have taken it several times myself since and about one year ago I gave it to my two children. They recovered very quickly with no bad results, after taking one bottle. I have recommended it to quite a number of late."—Mrs. W. J. SIMKINS, Kilbride, Ont.

The best time to cure a cough is when it starts. Ordinarily, a few doses of Dr. Pierce's Golden Medical Discovery will cure a cough at the beginning. But even when the cough is deep-seated and the body is wasted by emaciation, Dr. Pierce's Golden Medical Discovery will in most cases effect a permanent cure.

Get it to-day from any medicine dealer; it is a powerful blood purifier, so penetrating that it even gets at the impure deposits in the joints and carries them out of the system.

Remember it is not a patent medicine for its ingredients are printed on the wrapper. It's a pure glyceric extract of roots, made without alcohol.

Depend upon this grand remedy to give you the kind of blood that makes the skin clear and puts ambition and energy into the entire body. You will not be disappointed. For free advice, write Dr. V. M. Pierce, Buffalo, N. Y. Trial package tablets 10 cents.
