CROP TO PLANT LATER

Provide for Winter as Well as Immediate Needs.

CABBAGE AND OTHER THINGS

Good Food Products Can Be Secured by the Amateur by a Little Labor and a Small Expenditure.

(By S. C. JOHNSTON, Vegetable Specialist, Ontario Department of Agriculture, Toronto.)

Besides growing many vegetables for immediate use the backyard garden should produce some vegetables which can be stored for consumption during winter months. Some, of course, do not need to be planted as early as the plants which were described last week. Possibly a week should elapse from the time the lettuce is planted before these should be sown.

BEETS, CARROTS, PARSNIPS, AND SALSIFY. These include the most important members of the root vegetables. They are usually grown for winter purposes, though beets and carrots are relished by many in their earlier stages of growth. All these demand practically the same attention. The seeds should be sown in straight rows at a depth of about three-quarters of an inch. When the plants have reached a height of two inches they should be carefully thinned out so that they stand, beets and parsnips three to four inches apart, carrots and salsify two or three inches apart. It will be found that the parsnips are very slow growers, and for this reason it is some-times advisable to plant a few seeds of lettuce with the parsnip seeds so that they will serve as a marker. The young beet plants may be used as spring greens. It is necessary that the soil be cultivated at intervals during the summer months so that the crops may grow. They do not as a general rule require as heavy watering as some of the other vegetable crops. In the fall the beets should be pulled up and the tops twisted off close to the head, not cut off with a knife as in the case of carrots, parsnips, or salsify, which should have the tops cut about one-half inch from the roots preparatory to storing for winter use.

CORN. In planting corn holes about two or three inches deep should be made with a hoe. Five or six kernels of corn should be dropped in this and covered with soil, which should be gently firmed by tramping on it. When the shoots are about three inches high all excepting the three sturdiest should be pulled out. The soil should be drawn up around the stalks as they grow, to give them support. When the kernels on the cob appear full of milk they are ready to use. It is also a good practice to cultivate the soil often around the corn, for expert growers claim that the crops corn and cabbage faster and better when plenty of cultivation is given.

CABBAGE. Cabbage is one of the most widely grown vegetables. The cabbage plant requires a supply of moisture, and yet if the cabbage soil is too wet the plant will be injured. Cabbage does particularly well on new land, and some growers claim that the cabbage grows without an abundant supply of manure in the soil better than many other vegetables. It is considered a good practice for backyard gardeners to purchase plants which have been grown in hot-beds or hot-houses and transplant them directly into the permanent bed. This saves considerable trouble. It is necessary when setting cabbage plants to set them fairly deep so that they will not be whipped about by the wind. They may be set eighteen inches apart, and there should be quite a good deal of soil around the roots. When they are ready to be set out a hole may be made with a dibber or a sharpened stick. The roots may be watered after they have been set. One of the most important features of growing cabbage consists in the attention given to cultivation of the soil. There may be some occasions when the head will split, this may be stopped or prevented if the head is taken in the hands and turned forcibly from one side to another.

CAULIFLOWER. The cauliflower is treated in much the same way as cabbage, the plants being grown and set out in the same manner outside. They are treated practically the same as cabbage until it is noticed that a little white flower has commenced to grow. The dry leaves of the plant should be brought together at the top and tied with a piece of string so that these little white flowers are protected from the rays of the sun and the rain. All cauliflower heads should be treated in this manner when they are about two inches in diameter.

BRUSSELS SPROUTS. Brussels sprouts are perhaps the most hardy of the cabbage family. If it is impossible to secure brussels sprouts plants a few seeds may be planted about May 15 at a depth of about one inch. These should be transplanted to the permanent bed about the 15th of June. They should be set eighteen

inches in the row and two feet between the rows. It is well to keep the patch clean, and the surface soil should be stirred frequently. It is unnecessary to trim off the leaves as the plants grow in the garden.

SWISS CHARD. Swiss chard can be grown easily from seed, in rows twelve inches apart, the young plants being thinned to six or eight inches apart. The advantage of this plant is that the leaves may be pulled off close to the root and new leaves shoot up, which may be consumed during the season. The roots are used for greens and the stem of the leaf as asparagus. A few plants should be sufficient for a small family.

Necklace Worth Fortune.

As the result of five minutes' bidding, which started at \$10,000, the sum of \$25,600 was paid for a pearl necklace at the great pearl sale conducted by Debenham, Storr and Son, says London Chronicle. The purchaser was a dealer—Mr. S. H. Harris—and he secured what was described in the catalogue as "a matchless necklace of 45 superb pearls of remarkable size, perfect shape, color and match, and of beautiful symmetry of graduation, weighing 917.96 grs." The collection and matching of the pearls are said to have occupied a period of upwards of 23 years. For other pearls of pearls \$9,800, \$4,050, \$4,600, \$5,000, and \$2,150 were paid.

Green Uniforms Used.

British hospital surgeons have adopted green uniforms in place of the long-used suits of white. The hospitals also are being fitted in green. The color is said to be less trying to the eyes of both patient and doctor.

Miller's Worm Powders will purge the stomach and intestines of worms so effectively and so easily and painlessly that the most delicate stomach will not feel any inconvenience from their action. They recommend themselves to mothers as a preparation that will restore strength and vigor to their children and protect them from the debilitating effects which result from the deprivations of worms.

An Old Coat.

My coat and I live comfortably together. It has assumed all my wrinkles, does not hurt me anywhere, has molded itself on my deformities and is complacent to all my movements, and I only feel its presence because it keeps me warm. Old coats and old friends are the same thing.—Hugo.

Too Few.

Hub (during the spat)—I don't believe in parading my virtues. Wife—I don't see how you could. It takes quite a number to make a parade.—Boston Transcript.

What He Said.

"I left home when a mere child. I was discharged from home by my father for painting the front door black in a fit of childish mischief." "What did your father say?" "Go, and never darken my door again."—Exchange.

Condensed Plots.

"Why are you so fond of moving pictures?" "My parents wouldn't let me read novels in my youth. I'm making up for lost time."—Washington Star.

Too Much.

Ned—Is she all your fancy painted her? Ted—No. My fancy never would have put the paint on so thick.—Town Topics.

HOW DO YOU KNOW

That old sore from which you are suffering is incurable? Zam-Buk has cured thousands of cases of chronic sores. Mrs. Nellie Lucas of Silver Lake, Oregon, writes: "My father developed a sore on his face which became very swollen and painful. We tried numerous remedies, and several doctors attended him, but the sore got no better, and the doctor said the only hope of curing it was an operation. Father determined, however, that he would first try Zam-Buk. "Even after the first few applications of this wonderful balm he felt great relief. Gradually the pain was ended, the inflammation was all drawn out, the swelling disappeared and the sore was soon healed." Zam-Buk is equally good for eczema, ringworm, blood-poisoning, bad legs, piles, burns, scalds and cuts. All druggists and stores or Zam-Buk Co., Toronto. 50c. box, 2 for \$1.25.

WIFE FINDS RELIEF, TOO!

Lachute Mills, P.Q. "I was troubled for many years with Kidney Disease, and a friend told me to take GIN PILLS. After taking a few boxes I was greatly relieved, and after finishing the twelfth box the pain completely left me. My wife is now using Gin Pills and finds that she has been greatly relieved of the pain over her kidneys. I can safely recommend any one suffering from Kidney trouble to give a fair trial to GIN PILLS. Thomas Stephenson." All druggists sell Gin Pills at 50c. a box, or 6 boxes for \$2.50. Sample free if you write to NATIONAL DRUG & CHEMICAL CO. OF CANADA, LIMITED Toronto, Ont.

ONTARIO'S BEST BUSINESS COLLEGE STUDENTS may enter our classes at any time. Commence your course now and be qualified for a position by Midsummer. During July and August of last year we received calls for OVER 200 OFFICE ASSISTANTS we could not supply. Our graduates are in demand. Write at once for our free catalogue. D. A. McLachlan : Principal.
