Wealth of Waterloo.

A County Justly Famed as Rich Agriculturally and a Great Hive of Industry.

BY HIS HONOUR JUDGE CHISHOLM, IN GALT REPORTER.

One of Galt's best informed and most intelligent citizens made the remark to me not long ago that, with the exception of York County—in which Toronto is—the County of Waterloo is the richest county in the Province, and it is observed in very much on account of her manufactures.

The result of my own observation and knowledge of the Province confirms this. Then in enquiring into the reason, we have to look at the quality of the inhabitants and the country.

The County is principally settled by Scotch, Pennsylvania Dutch and Germans, the most thrifty, industrious, and persevering people of Christendom, people who are the architects of their own fortunes; people who were not born with a silver spoon in their mouths, but with the traditional wooden ladle. In becoming individually prosperous they have made the County a rich one.

The County is distinguished not only for the number but also for the variety of its industries. These are not confined to its larger centres of population, but each village and hamlet has one or more of them. The variety of its industries is an important factor in the continued prosperity.

There is Galt, with its heavy, solid, standard iron and wooden goods, safe manufacturing company, wood-working machinery company, machine knife factory, woolen mills, pump manufacturers, wheel works, saw manufacturers, edge tool works, carriage manufacturers, soap factory, windmill works, etc., making it the Manchester of Canada.

Then there is Berlin, the town of Waterloo, Preston, Hespeler, Ayr, New Hamburg, Baden, St. Jacobs, Wilmerville, Elmira, Port, Brecken, Doon and Elmira, with their different lines of furniture factories, shirt and collar factories, stove and furnace works, woolen mills, boot and shoe factories, etc.

boot factories, agricultural implement works, button and suspension works, glass factory, furniture factory, piano company, bicycle works, paper-box manufacturers, wood-working machinery company, rubber goods manufacturing, lined oil mills, twine manufacturing, linen mills, binding machines and implement factory, large sawmills, cigar factories, distillery, brewer's, broom factories, drain tiles, water and sewer pipe factories, cheese factories, carriage works, large flour mills, saw mills, stove factories, foundries, potteries, &c., all these thriving and increasing and many of the buildings being added to. Then the County is well known throughout the land for its insurance companies, both fire and life. On rising from a perch of such a list of industries—and all are not enumerated—one cannot help exclaiming, "Verily, the County of Waterloo is a hive of industry."

The County of Waterloo is not only a rich one, but it is also a great one in the matter of manufacturing. It is working and earning more wealth. It is a happy circumstance also that so much wealth is distributed instead of being in a very few hands. The foundations of prosperity are being added to. Then the County is well known throughout the land for its insurance companies, both fire and life. On rising from a perch of such a list of industries—and all are not enumerated—one cannot help exclaiming, "Verily, the County of Waterloo is a hive of industry."

The County of Waterloo is not only a rich one, but it is also a great one in the matter of manufacturing. It is working and earning more wealth.
