

VICTORIA, B.C.

Situated at the southern extremity of Vancouver Island, is a city of nearly 23,000. It is remarkable for its delightful situation and the beauty of its surroundings. In addition to its inner land-locked harbor, extensive docks have been constructed at its entrance, capable of accommodating a large fleet of ocean steamers and sailing vessels. Victoria enjoys a very large wholesale trade with all parts of the province, and being a favorite resort for tourists who visit the Pacific coast, considerable retail business is transacted with these visitors, making the general trade of the city very large. Victoria is well laid out, and in the business portion of the city there are numerous handsome business blocks and public buildings. It is the seat of government in British Columbia, and the new government buildings being erected to take the place of the present structures will be very handsome. Victoria is celebrated for its beautiful parks and drives and the splendid scenery surrounding it. It has water-works, gas and electric light, the streets being lighted by the latter—electric tram-cars run on the principal streets. Victoria is connected by daily steamers with Vancouver, New Westminster and the Puget Sound cities, Seattle and Tacoma. By this means the city is in direct connection with the Canadian Pacific and other roads. The Pacific coast steamers to San Francisco have their northern headquarters here. It is also the terminus of the Esquimalt and Nanaimo Railway, and there is a regular tramway service to Esquimalt. A large fleet of steamers run between Victoria and all the mainland and island ports. It is the headquarters of the sealing fleet and the cannery interest, most of the trade of the latter being held by Victoria merchants. It is, therefore, an important commercial centre, as well as a favorite tourist resort.
