

## When you buy Ground Feeds

You might just as well have the very best on the market. Scientific feeders who aim for the biggest and best results heartily endorse these four:—

Schumacher Feed  
Molac Dairy Feed

Banner Feed  
Victor Feed

The above four represent the most perfect mixture of food ingredients for their respective purposes. Finely ground and properly balanced. The grinding alone adds greatly to the digestibility.

Every sack carries an analysis tag, showing the percentages of Protein, Fat and Fibre guaranteed.

Ask your dealer for these feeds and you are sure to get quality. Accept no substitute—the best is always the most economical and satisfactory in the end.
