

STEEL BARB WIRE

is adopted by railroads, stock rainfix and farmers on account of its SUPERION STYLE OF BARB which passes between the two wars, thre wound around both and afterwards galranted by a PATNNT PROCESS, which prevents the baits from rutting, and contequently when an animal is ponctured it will heat quickly and not fester as is the case with unity and ragged baths.

This standard writte is compounded with the

This standard article is compounded with the greatest care. Itseffects are as wonderful and anti-factory as ever it restores gray or faded hair to its youthful color. It removes all emptions, uching and dandruff, and the scalp by its uso becomes white and clean. By the twin-projecties it restores the capillary glands to their re-mal vigor, preventing baldness, and making the hair grow thick and strong.

As a dre-ring nothing has been found so effectual, or desiral!

Dr A A Hayes, State Assayer of Massachusetts, says of it. "I consider it the best preparation for its intended purposes."

## BUCKINGHAM'S DYE,

For the Whiskers.

This elegant preparation may be relied on to change the color of the beard from eray or any other undestrable shade, to brown or black, at discretion. It is easily applied, being in one preparation, and quickly and effectually produces a permanent color which will neither rub nor wash off.

PRESERVING EGGS.—To preserve eggs the chief principles are the exclusion of air, keeping the small cod downwards, and a cool place. Smearing the shell with oil or with gum arabic is the method which some adopt for excluding the air, or a solution of quick-lime and sair, of consistence just to cause an egg to sum with its top at the surface of the liquid.

Vignus Course —The contract the surface of the liquid.

Scientific and Agelui.

VIENNA COFFEE.—The coffee can be pre-pared either by the French method of filtering. or by the more common method of making in a coffee-pot, only taking care that the water is boiling, bubbling hot when poured over the coffee, that it is covered closely and only boiled one minute, then left to simmer five minutes. To be made strong or weak to suit the taste. minutes. To suit the taste.

OATMEAL.—It has long been noted that in countries where oatmeal and not line flour is in general use children and adults will be found with the best developed teeth and jaws, and so well recognized is the influence of oatmeal upon the teeth that many practitioners order its use as an article of daily diet for children in cases where dentition is likely to be retarded or imperfect. likely to be retarded or imperfect.

ORANGE OMELETTE.—Place one half teaspoonful butter in a frying pan; mix together, without beating, the yolks of three eggs, the grated rind of an orange, one tablespoonful of juice, and one dessert spoonful of sugar; then beat the whites to a stiff froth, mix with the above, pour into the butter pan, and immediately begin to lift with a fork towards the centre.

ICE IN THE SICK ROOM.—Cut a piece of flannel about nine inches square, and secare it by a ligature round the mouth of an ordinary tumbler, so as to leave a cup-shaped depret ion of flannel within the tumbler to about half its depth. In the flannel cup ao formed, pieces of ice may be preserved for hours—all the longer if a piece of flannel from four to five inches square be used as a loose cover to the ice-cup. cover to the ice-cup.

BAKING APPLES.—The apples should be large, juicy, sour apples. Pare the apples and remove the cores, leaving the apples whole. Place them in a deep earthen dish, add to them one tablespoonful of water; put them in a hot oven, and bake until perfectly soft and tender. A few moments before removing them from the oven sprinkle them lightly with white sugar. They will then brown richly, and have a delicious flavour. Serve hot or cold, according to taste. Serve hot or cold, according to taste.

Serve hot or cold, according to taste.

RICE CALAM.—Bake two ounces of Carolina rice in a pint of milk; this done, remove the skin from the top and mix with it a custard made as follows:—Boil a pint of milk with a quarter of a pound of lump sugar. pour it on to the yolks of two eggs, and atir over the fire until it thickens. Flavour with vanilia, dissolve, half an ounce of Nelson's galatine in a gill of milk, and when both it and the custard are cool, mix together and then all it with the rice. Ornament the mould with glace cherries which have been soaked in a spoonful of brandy during the making of the cream. Put in the rice cream and let it stand for a few hours.

A VALUABLE GLUE.—Households will be

A VALUABLE GLUE.—Households will be glad to hear of a very permanent glue, which is made by an admixture with common glue of one part of acid chromate of lime in solution to five parts of gelatine. The glue made in this manner, after exposure, is insolable in water, and can be used for mending glass objects likely to be exposed to hot water. It can also be made available for waterproofing atticles, such as sails or awnings, but for flexible fabrics it is not suitable. A few immersions will be found sufficient to render the article impervious to wer. It is necessary that fractured objects should be exposed to the light after being mended, and then warm water will have no effect upon there. A VALUABLE GLUE .-- Households will be

IF YOU DON'T BELIEVE IT, ASK ANY GERMAN.

ANY GERMAN.

And he sill convince you that St. Jacobs Oil is the most wonderful remedy that has ever been brought before the public. Rhemmatism of many years standing has yielded immediately to its almost magical influence. As many have expressed, its action is electrical, seeming to drive he pain before it until all discomort leaves the body and the warm glow of health and comfort remains. It is a certain cute for neuralgis, hiring immediate clief upon the first application, and cuting in a short time, the most invertible
