

in the direction of the physician's noblest and most unselfish work—the prevention of disease. We shall have the pleasure this afternoon of learning something respecting the invaluable work accomplished by one of our committees, known as the "Milk Commission," during the past two years, under the able chairmanship of Dr. Chas. J. Hastings.

It would be interesting to give some account of the work done by our Executive Council, the various standing committees, the committee having in charge the establishment of a journal, the local committees, and many individual members in all parts of this big Dominion during the past year. Your President on this occasion, however, cannot find words to describe their work in a fitting manner. Even if he were inclined to undertake such a task the Committee of Arrangements has not given him a sufficient number of hours to accomplish it.

We are all happy now over the present condition of our Association. We are filled with hope for the future. We are becoming national in the true sense of the term. May I add—we are growing more imperialistic. We really want not only Dominion registration, but also reciprocity with the profession of our dear Mother Country. Although we are plunged in grief over the appalling calamity that has befallen our great Empire, our wish, our song, our hymn, our prayer is still—God save the King.
