**TEACHERS  
... AND ...  
Life Insurance!**

In all ordinary companies no regard is had to whether a man is a total abstainer or not in classifying his insurance and allotting him profits arising from saving in mortality and other sources—but mainly from saving in mortality—although it is well known that where observation has been made they have proved much the better risks, and should be entitled to much larger profits.

Teachers should, and many of them do, recognize this and place their insurance accordingly.

*The Temperance and General Life  
Assurance Company*

is the only Company in Canada that so classifies its risks, as to give total abstainers all the advantages that should be secured to their better lives.

The experience of this Company indicates most progressive and careful management, and the records show that due regard is had to economy, and the safe and profitable investment of its funds.

Careful selection and proper classification of risks, wise economy in the administration of its affairs, and judicious investment of its funds under progressive management, will make any company a success.

These features characterize the Temperance and General Life, and commend it to the confidence of all intending insurers.

Correspondence solicited and literature sent on application to any address.
