FREDERICTON BUSINESS COLLEGE

The only institution between Ottawa and Halifax in affiliation with the Business Educators' Association of Canada.

Address— **W. J. OSBORNE,**
FREDERICTON, N. B. PRINCIPAL.

HYLOPLATE BLACKBOARD.

WHAT IT IS: A PRODUCT of wood pulp, which, with cements, is made into large slabs by pressure. The slabs are uniform in thickness and can be obtained in pieces as long as 12 feet, and 3 or 4 feet wide. The writing surface is the best Liquid Slating, and will not have to be renewed for many years. It takes chalk properly and the erasing is easy and perfect.

WHY IT IS THE BEST: BECAUSE it will last as long as the schoolhouse and will not warp, crack or split. Anyone who can drive a nail can put up Hyloplate. It is light to handle and does not break in shipment or when putting it up. It is only half the price of slate besides the great saving in freight and breakage.
