

Coal Production Over and Above Plan

The amount of coal hauled from Vorkuta over and above plan has passed the 5-million-tonne mark. Since the beginning of the current five-year Plan, a thousand trains, loaded with coal mined above quota, have been sent off to consumers. Miners of the Pechora Coal Basin celebrated the October Revolution holiday with all mines producing on schedule. One hundred forty-five workers' collectives are participating in the competition for improved labour productivity with the work rate for nearly a third of these up by one-and-a-half times.
