Crinoid Stems.		
Halopea		Grimsby
Six or seven Fucuoids, (Hamilton), omitted in Spencer's list; also some undescribed Bucannella trilobata—	Conrad, 1838, Ann. Rep., N. Y.	

NOTE.—Since the catalogues of local fossils were prepared, Dr. Jas. Hall, Director-general of the New York State Survey, has figured and described "Lingulops Granti," Niagara beds, and "Lingula Lingulata," Clinton, from Hamilton, Ont., Silurian rocks. A few others, also, were lately obtained, not yet named.
