

# FROM THE PRESS.

The following editorial notices from some of the leading Journals of the United States and Canada, are among the hundreds of newspaper testimonials we have received.

The Patent White Wire Clothes Line is a superior article. It does not injure clothes, and is almost indestructible. Every housewife should use it. We are now using it.—*N. Y. Tribune.*

The Patent White Wire Clothes-line is all it purports to be—a most indispensable article. It does not injure the clothes, and never wears out. Every house will ultimately have it.—*N. Y. Independent.*

**THE WHITE WIRE CLOTHES LINE.**—Among the special annoyances of the washing day are to be reckoned high up the list the ill adaptation of clothes lines. The old cord or rope has done much good service; but with its breaking, rotting out, discoloring the clothes, and the annoyance of putting up and taking down each week, it is not quite a perfect article. A substitute is now offered in the "Patent White Wire Clothes Line," patented by the White Wire Co., Toronto. The peculiarity of this wire is in its coating, which entirely resists the effect of the atmosphere. We have seen it used, and find that it gives entire satisfaction.—*Christian Advocate.*

**THE WHITE WIRE CLOTHES LINE.**—Some of the richest advantages of invention are the simplest and the closest to common work-day life. To these one more has been added in the "WHITE WIRE CLOTHES LINE," another alleviation of the old time "Washing day." We have tried the article and can speak of domestic establishments filled with its praises. The inventor is a genuine benefactor. Whoever now willfully inflicts upon his family the troubles of the Rope Clothes Line, deserves to receive his fresh linen soiled.—*Daily News.*

**A USEFUL INVENTION.**—The new wire for clothes lines bids fair to supersede every other in use. The patent is on the coating of the wire, and this is well nigh indestructible. From the evidences we have seen and the testimony as to its durability and value we have no hesitation in recommending this wire to our friends and patrons as all that its inventors claim for it.—*Central Christian Advocate.*

**PATENT WIRE FOR CLOTHES LINE.**—We have seen this new invention tested to the entire satisfaction of some experienced house-keepers. The White Wire Clothes Line is a great improvement on the old Lines hitherto in use. From its peculiar coating, it does not injure or stain the linen, and it is almost indestructible.—*Guardian.*

The Patent Wire Clothes-line possesses important advantages over any other. It is made of white wire, will not corrode even in salt water, cannot be loaded heavy enough to break it, and does not discolor or injure clothes hung on it, and they never freeze to it. Its advantages are such that it must in time come into universal use.—*Weekly Examiner.*

A few days since we advertised a new kind of Clothes Line, made of white wire, which it was claimed possessed many advantages over every other contrivance for the same purpose. Since then we have made trial of the new line, and are satisfied it is a superior article, saving much labor, and being very convenient and durable, while it will not soil the most delicate fabric. When once well put up, it will last an ordinary life-time.—*Daily Journal and Courier.*

**PATENT WHITE WIRE CLOTHES LINE.**—This article is one of the comforts of the age for housekeepers. Its superiority over the rope line is universally acknowledged. It will out wear at least twenty-five of the old lines, and never lets the clothes into the mud. Its cost is trifling, and the money will be refunded, if it does not prove as represented.—*Warwick Advertiser.*

**PATENT CLOTHES LINE.**—We have received from G. W. King & Co., sole agents for the White Wire Company, one of their patent metallic clothes lines, made of white wire. It costs three cents per foot and will last at least twenty years. It never discolors clothes, is very strong, and has other advantages too numerous for us to mention.—*Daily Public Ledger.*

Space will not allow us to introduce more here, but if we had room we could publish certificates enough to fill the largest newspaper in Canada.

## AGENTS WANTED EVERYWHERE.
