*Note—The "Rateable Property" is that part of the various
descriptions of Property subject to direct taxation, according to
the rate, ad valorem, established by Act of Parliament—the
amounts therefore included under this head, represent only a part
of the existing property, and include cultivated lands and build-
ings, real estate, as well as chattel property—but as the property
logs, real estate, as well as chattel property—but as the property
is stated far below its real value, the figures in this column do not
represent even the value of the chattel goods. Still as the rate
is fixed, the ratio of increase is fairly shown—and gives an in-
crease of Ten per cent. in two years.
