at the new-born infant's cry, tells the story of woman's sympathy for her sister-woman. If women would only spread the medical gospel, that a woman is unfitted for wifehood and motherhood as long as she suffers from weakness or disease of the distinctly womanly organism, there would be less necessity for the sisterly sympathy that a woman receives when she is in the throes of child-bearing.

A woman who is thoroughly strong and healthy in a womanly way has to suffer comparatively little pain and sickness when she becomes a mother. Dr. Pierce's Favorite Prescription acts directly on the delicate and important organs that bear the burdens of maternity and gives them health, strength and elasticity. It allays inflammation, heals ulceration and soothes pain. It banishes the discomforts of the faint-hearted period and makes baby's advent easy and almost painless. It insures the newcomer's health. Over 90,000 women have testified to its marvelous merits and many of them have permitted their experiences, names, addresses and photographs to be printed in Dr. Pierce's Common Sense Medical Adviser, so that other women may learn of this wonderful medicine. Good medicine dealers sell it.
