rapidly and can so completely honeycomb the pile in a few months that it will not even support its own weight.

Quite the opposite from the teredos in their method of attack and the marine borers called limoria. They begin on the outside of the piling and in less than a year make it look like a half-eaten stick of candy.

When both these pests get to work on the same pile it usually lasts about six months.

One of the most promising methods of protection which has been tried by the laboratory is that of treating the piles with creosote. Properly creosoted wood piles are very durable and the marine borers called limoria. They begin on the outside of the piling and in less than a year make it look like a half-eaten stick of candy.

ST. JOHN MAN IN PINEHURST FINAL

Pinehurst, N. C., April 8.—B. P. Merriman, of Waterbury, and Gardiner White, of Nassau, will meet tomorrow in the finals of the north and south amateur golf championship. In the finals today White defeated Perry Adair, of Atlanta, four and three, while Merriman defeated Frank Dyer, of Upper Montclair, two up.

Eric Thomson, of St. John, came through to the final in the eleventh sixteen at the expense of E. H. Finney, of Springfield.
