SAINT JOHN, N. B., WEDNESDAY, MAY 6, 1925

TWELVE PAGES—ONE CENT

SARVE OF MARITIME INDUSTRY IS URGED

BRANCH CHIEF OF C. M. A. GOES INTO PROBLEM

Manufacturers In Annual Session In Saint John

CALLS FOR FAITH

Reviews Situation and Views Future With Hope—Tariff And Other Topics

A COMPREHENSIVE and concrete industrial survey of the Maritime Provinces was urged by C. S. Sutherland of Amherst, N. S., president of the Maritime Branch of the Canadian Manufacturers' Association in his address at the annual meetings of the organization held in the Board of Trade rooms. Tariff matters also were given attention. While conditions in industry were not altogether as could be asked for at present, he emphatically said there was no discouragement and he looked forward to the future with great hope.

He impressed the advisability of Maritime people showing their faith by investing their surplus money at home.

FOR DEVELOPMENT.

A feature of the meeting is to be an open discussion on ways and means of encouraging the development of manufacturing in the Maritime Provinces. There is to be an address by Mr. M. H. Bell, and one by R. N. McDermick, tariff expert of the Canadian Manufacturers' Association. The speakers will be followed by a discussion on the tariff situation.

Among those who had arrived in the city this morning to attend the meeting were C. S. Sutherland, of the Amherst Boot and Shoe Company, Amherst; C. R. Walker, of the Cross Refrigerator Company, and J. M. Thomson, of the Dominion Iron and Steel Company, Sydney; A. D. Ganong, of Ganong's Limited, St. Stephen; and Angus McLean, of the Bathurst Lumber Company, Bathurst.

Mr. Sutherland, in opening his address, said the Maritime manufacturers did not get together as often as in other provinces. Perhaps that was a reason why greater industrial development had not been attained. He favored frequent meetings and said the manufacturers owned the industry and to be properly represented before the legislature and the general public.

"Non-representation," he said, "is usually a synonym for misrepresentation. Meetings of the association and the resolutions arising therefrom, act as an aid in the formation of public opinion, and as a guide to our legislators. The Maritime manufacturers should accept their full responsibility with respect to this."

The work of the Canadian manufacturers' Association was praised by Mr. Sutherland. His term as president had impressed him with the need and efficacy of the organization. He referred to matters taken up during the year.

MARITIME MATTERS.

"Perhaps the Maritimes have not attained the degree of development which has been expected or their resources have warranted," he continued. "This is a matter that has been engaging the earnest attention of Maritime people during the last two years with a desire to ascertain the reasons why. Rightly or wrongly we usually blame the governments of the day for many of our ills. The tariff is an old perennial which always hobbles up and down. I have in mind at present the tariff on wool. It is an important factor in determining the success or non-success of certain industries. I have in mind at present the tariff on wool. It is an important factor in determining the success or non-success of certain industries. I have in mind at present the tariff on wool. It is an important factor in determining the success or non-success of certain industries."

ASSIGNS REASON

"You ask me why? Well the reason is not far to find. The great mills of England, Belgium, France and Germany shut off from the Russian trade with its purchasing power of four hundred million people must find an outlet for their products, and for nearly two years no smoke is seen belching from its great chimneys and its many looms and spindles are as silent as the grave. In the town of Oxford is another woolen plant also fully equipped and ably managed. This factory has been in operation for half a century, but today we do not find the same large stream of employees going to or from that once prosperous industry as of yore and part of the time no wheels are turning."

Negro Singers Refuse to Give Selections Before Women's Council; Charge Discrimination

WASHINGTON, May 6.—Delegates attending the quinquennial convention of the International Council of Women came face to face last night with a typically American problem. The programme, designed to show the development of American music, included negro spirituals of the 1860 period. But the negroes didn't sing because members of their race not included among delegates to the convention had been segregated in the audience.

PARIS, May 6.—Le Matin says Foreign Minister Briand this week will sign the French reply to Germany's suggestions regarding a security pact. The allies will be promptly furnished with the text of the reply. When all the interested parties have forwarded their replies to Berlin, negotiations with a view to arriving at a solution of the security pact can begin.

THREE NATIONS PLAN CONQUEST OF POLE BY AIR

First Attempt Scheduled To Start This Afternoon

AMUNDSEN READY

Will Be Followed By MacMillan And Alagarson Later In Summer

NEW YORK, May 6.—Rolf Amundsen's impending dash to the North Pole by airplane, tentatively set to start this afternoon from King's Bay, Spitzbergen, marks the beginning of the efforts of three nations to conquer by air that portion of the frozen northern wastes.

AMUNDSEN READY

Alagarson's attempt, terminated as daring as the MacMillan-United States navy expedition, is conceded to be elaborate. In a blimp, the gas bag of which is less than one-twentieth of that of the Shenandoah, Alagarson hopes to take off from his ship, Littera, anchored somewhere west of Spitzbergen. Like Amundsen, he will be content with a dash to the pole, and a few days exploration.

MACMILLAN'S PLANS

MacMillan's is the only expedition which hopes to chart definitely that vast unexplored area on the Alaska-Siberian side of the pole. Quarter the size of the North American continent, this area may be the most important continent both Peary and MacMillan on a previous expedition, claimed they saw could not reach.
