THE WONDERFUL URGES DOMINION GOVERNMENT TO SHOW SOME SIGNS OF LIFE

Every Home in Canada Needs "Pound of Action Is Worth a Ton of Oratory," Fort William Taken To Develop Can ada's Natural Resources -Western Membes Urge Need of Irrigation Work.

Canada, one of the potential ironproducing countries, had in 1920 produced only six per cent of the iron
used in the Dominion.

Duplication and over-development of
Canadian railways was stressed by
Capt. Manion in his claims that this
country possessed one mile of railway
to every 200 persons as against one
mile to 400 persons in the United
States and one mile to every 2,000 persons in Great Britain. The proper
diversion of traffic along a minimum

diversion of traffic along a minimum mileage was his suggestion for a remedy. For the fullest development of Can-For the fullest development of Canada's resources he suggested, first, a tariff against the importation or iron ores; second, financing of private corporations, and, third, a thorough investigation into the entire situation.

While instancing Canada's 'niggard-liness in its treatment' of experts employed in the development of natural resources, Capt. Manion declared that cooks on geological parties received as high a wage as technical experts were paid.

Supports Resolution.

Dr. Cowan (Regina) supported the solution, and said that at the same he hoped to see a policy which some cough, ease the tightness across only to the develop-

anthracite,

The feeling in the West toward the development of natural resources had completely changed. Today the young men of Western Canada were calling for industrial expansion. The Government should exercise every means in its power to make the natural resources of the greatest value to the country. inthracite.

sources of the greatest value to the country.
Frank S. Cahill (Pontiac) ironically congratulated Captain Manion for criticizing the Government for not developing natural resources. The only development by the Government so far, Mr. Cahill said, was to extend to a gentieman named Stefansson the privilege of raising reindeer. Very soon the reindeer industry would vanish, as it was altogether likely that the Hudson Bay Company would buy Mr. Stefansson out.

anson out.

The only suggested method by Captain Mannian was the good old Tory one of a bounty on developments. It was the Tory way to try and develop the country before leading their friends to the treasury.
Captain Manion interjected that he had not suggested a bounty, but on the other hand, had suggested an in-

estigation, Mr. Cahill retorted that Captain Man-

Bald

Mr. Cahill retorted that Captein Manion suggested a bounty last year, and again asserted that the whole thing worked on a basis of how much it was possible to get out of the treasury. It was impossible to get out of the treasury. It was impossible to get out of the treasury. It was impossible to get out of the treasury. It was impossible to get out of the treasury. It was impossible to get out of the treasury. It was impossible to get out of the treasury. It was impossible to get out of the treasury. It was impossible to get out of the country without a sound policy of immigration.

Excludes Settlement.

Mr. Cahill said that the whole thing worked on a basis of how much it was possible to get out of the treasury. It was impossible to get out

The Advertiser's Puzzle

WINNERS SHARE \$2,500

YOUR OPPORTUNITY TO WIN IS JUST AS GREAT TODAY AS AT THE BEGINNING OF THE CONTEST. STILL PLENTY OF TIME.

PUZZLE CHART

This Chart with chain drawn across it and blank beneath attached must be returned as your solution,

2387452343256345432547854 7452389476947232749832523 6967436727896749276347694 9896565296325858925656985 8963274965476349694723694 7254585838587278385854587 4389836747234963476389836 5692347298569852927432925

TO PARTICIPATE IN CONTEST

This contest is open to all residents of the Province of Ontario. Solutions of the puzzle will not be accepted from outside of this territory. While addresses for delivery of the paper may be changed as desired, all communications and matter relating to the contest must pass back and forth from the original addresses of contestants. The contest is open to men and women under the following terms:

Anyone in the Province of Ontario, upon making a subscription payment to The London Advertiser of not less than \$2.75, or more than \$10.00, may submit a solution of the puzzle. You may submit a solution of the puzzle. You may submit as many different solutions as you wish with a subscription, on payment of not less than \$2.75 or more than \$10.00 with each one solution, the payment with each one will be applied to extending the subscription already in force, unless otherwise directed. If you are already a subscriber, your subscription will be extended from the time last paid to, whether you receive the paper by mail or carrier. New subscriptions will be started as soon after receipt of solutions as possible. No change will be made in any carrier service you are now receiving the paper through. All amounts paid will he credited on subscription at the regular rates, so you cannot lose, while standing an equal chance to win a valuable cash prize.

FACTS TO REMEMBER

While the amount you pay with a solution of the puzzle does not have any effect on your winning a prize, it does affect the amount you will receive, should you win one of the first five prizes, as the value of these prizes is determined by what the winners pay. This is explained in the prize list, which you should study carefully before sending in your solution.

The value of the first five prizes may also be increased \$100 each by interesting four people who are not now subscribers to become subscribers. The sum of \$25 will be added for each new subscriber, not to exceed four, Each of the new subscribers must pay not less than \$2.75, and he has the privilege of entering the contest, if he wishes to do so, upon the same terms as any other contestant, the \$2.75 or more up to \$10.00 paid by him entitling him to submit a solution of the puzzle. Whether these new subscribers submit solutions of the puzzle or not, each one must sign a separate blank, so

subscribers submit solutions of the puzzle or not, each one must sign a separate blank, so that the records may be kept in such a way as to show by whom they were interested. If no solution is sent by a subscriber you interest, merely write across the face of the chart, "No solution submitted" and send it in attached to the blank. Any one or all of the names of any new subscribers may be sent in with your solution, or any time later you wish before the close of the contest.

Extra Charts Furnished

Those desiring extra charts to work on will be supplied with what they require if they will either call at The Advertiser contest office in person, or send a self-addressed, or send a self-addressed, stamped envelope for mailing them. The office is located at 110 Dundas street. Postoffice Box 578.

If the paper is already being

NOTE.—Contestants desiring the paper sent to somebody else should merely attach a note to this blank giving name and address of persons they wish the paper sent to. Any subscriber whose name or address is not correct on the label of his paper will please fill in this blank as it should be and attach note to blank, giving name and address as it is now printed on his label. THE' PROBLEM

The problem is to draw a chain of circles once across the chart, from the first column on the left to the last column on the right, selecting the figures to encircle from which you can obtain the greatest difference between the sum total of the even and the sum total of the odd figures. The odd figures are 3, 5, 7 and 9, and the even, 2, 4, 6, 8. By "sum total" is meant the figures added together. That is, you are to take the odd figures you put circles around, and add them up; then the even figures, and the difference between the two totals is your solution. It makes no difference which of the two sum totals is the larger; the greatest difference you can obtain either way is what counts

The chain must be drawn in continuous sections of

tain either way is what counts

The chain must be drawn in continuous sections of either three, four or five circles to a section. By "section" is meant three, four or five circles in a straight line. You may use either number of circles you wish in each section. The sections of the chain may go either up or down, or to the right, but not to the left. That is, up or down, or to the right, but not to the left. That is, or five circles up or down, as you wish; then proceed to the right, then up or down again; then to the right, and so on until you reach the last column. The chain must end with either three, four or five circles in this column.

In determining the number of circles in each section count the last circle in one section as the first in the next. The figures in the corner circles, however, are to be counted but once when adding them up to get the totals of the odd and even figures. You may start at any figure you wish in the extreme left-hand column. There must be one section running up or down in this column as well as in the last column.

Contestants should try all the combinations they can to see what is the greatest difference they can obtain between the sum total of the odd figures and the sum total of the even, or vice-versa. The prizes will be awarded for the greatest differences submitted, without regard to what the greatest possible difference that can be obtained may be. Only the figures you put circles around are to be considered. The following illustration will furnish a general idea for drawing your chain of circles. The illustration consists of double figures, such as 46, 69, 75, and so on, but the puzzle contains only single figures from 2 to 9. Hence the differences will be comparatively much smaller and the sum totals easier to obtain. Contestants should try all the combinations they

ILLUSTRATION

The accompanying illustration explains what a chain of circles The first section, it will be noted, consists of four circles; the second. three; the third, three, and so on. The sum total of the even numbers viz., 46, 58, 92, etc., is 750, and the sum total of the odd numbers, viz. 69, 75, 83, etc., 892. The difference between these totals is 142.

GENERAL RULES

This contest is wholly independent of, and is in no way connected with any other newspaper contest in London or elsewhere. The prizes are offered solely by this paper, and will be paid in accordance with the terms and conditions stated in this announcement.

The Advertiser offers these prizes for individual effort. While it is proper for members of one household to work together, or several friends, it is not permissible for more than one of those working in unison to send a solution of the puzzle. When in the judgment of the contest manager more than one member of the same family, or more than one of any number of persons he believes have worked together, send in a solution of the puzzle, he reserves the right to refund subscriptions and return the solutions he believes have been submitted contrary to the foregoing rule. The Advertiser also reserves the right to finally decide any other questions which may arise, and those entering the contest agree to abide by such decisions.

The spirit and intent of the contest is to reward those who work out the best solutions of the puzzle through their own independent efforts.

The time a solution is submitted has no effect upon its winning a prize. It is well, however, to send in your solution as soon as you have it in shape to submit. Something might arise to prevent you sending it in later, thereby causing you to lose the chance of winning one of the valuable prizes. If on the other hand, you submit an early solution, and later find you can improve upon your first effort, you have the privilege of submitting as many more solutions as you wish on the same terms as your wish otherwise your solution will be considered as incorrect, and ruled out of contest.

INFORMATION

In formation

In the event of ties on this puzzle, as many prizes will be reserved as there are contestants tied, before any prizes are awarded for a less correct solution. For instance, if five people tied on the best solution, the first five prizes would be reserved for them, and they would be awarded the prizes in accordance with the standing of their solutions of the second puzzle. That is, the one submitting the best solution of the second puzzle would receive the first prize; the one submitting the rext best, the second, and so on. No solution unaccompanied by cash to apply on subscription will be accepted. Solutions and the money should be sent together, not separately. No solution may be changed after it is once submitted. If you want to submit something different send another solution, accompanied by any amount you wish to pay from \$2.75 to \$10.00. It will all be credited on one continuous subscription, and you will have the satisfaction of knowing your paper is paid for that far in advance. No one directly or indirectly connected with The Advertiser will be permitted to enter this contest.

them. The office is located at 110 Dundas street. Postoffice Box 578.

If the paper is already being sent to your residence, but in the name of some other member of the family, and you do not wish an additional copy, merely answer "Yes" to the inquiry if you are already a subscriber, and attach a note to the blank stating in whose name the paper is being delivered to.

Contestants will find this puzzle offers unusual entertainment for a party of friends. If you want to pass a pleasant winter evening invite in a few friends, and give to each one a chart, and see who in a given length of time can work out the best result. It will prove to be a most interesting game. Extra charts may be secured for this purpose by calling upon the contest manager for whatever number is needed.

The best chart submitted in The-Advertiser, so that every contestant may check it up and compare it with his or her own work. The amount of the first five prizes depends on how much you pay on your subscription. You may pay as low as \$2.75, or as high as \$10.00.

FIRST CAPITAL PRIZE

MAXIMUM AMOUNT OF.....

\$100.00 in cash, to which will be added 50 times the amount paid by the subscriber with the winning solution; also \$25.00 for each new subscriber, not to exceed four, sent in with the winning solution.

The following table shows what the prize would be worth according to various subscription payments, without allowing anything for new subscribers:

\$ 2.76 subscription payment would net \$237.50 \$5.00 subscription payment would net \$350.00 \$7.50 subscription payment would net \$475.00 \$10.00 subscription payment would net \$600.00 Then add to each of these \$100.00 offered for four new subscriptions, and you will see you can win \$700.00 in all by paying \$10.00 on your subscription, and by sending in four new subscriptions. The new subscriber may pay any amount from \$2.75 to \$10.00.

SECOND CAPITAL PRIZE \$450.00 MAXIMUM AMOUNT OF \$100.00 in cash, to which will be added 25 times the amount paid by the subscriber with the winning solution; also \$25.00 for each new subscriber, not to exceed four, sent in with the winning solution.

110 DUNDAS STREET.

The Prizes THIRD CAPITAL PRIZE \$400.00

MAXIMUM AMOUNT OF \$50.00 in cash, to which will be added 25 times the mount paid by the subscriber with the winning solution; also \$25.00 for each new subscriber, not to exceed four, sent in with the winning solution; \$25.00 will be added to this prize if the winning solution is received by February 26. Contest closes on March 19.

MAXIMUM AMOUNT OF \$300.00

\$50.00 in cash, to which will be added 15 times the amount paid by the subscriber with the winning solution; also \$25.00 for each new subscriber, not to exceed four, sent in with the winning solution; \$25.00 will be added to this prize if the winning solution is received by February 26. All prizes have an added value for the person who sends in from one to four new subscriptions. New subscribers are worth as high as \$25.00 each.

FIFTH CAPITAL PRIZE \$200.00 MAXIMUM AMOUNT OF \$50.00 in cash, to which will be added five times the amount paid by the subscriber with the winning solution; also \$25.00 for each new subscriber, not to exceed four, sent in with the winning solution; \$25.00 will be added to this prize if the winning solution is received by February 26. Contest closes on March 19.
