

TRADE NOTES.

The Dodge Manufacturing Company, Limited, has succeeded the Dodge Wood Split Pulley Company, of Toronto.

Mr. Carl Zeidler, of Toronto, has been appointed Canadian representative for Messrs. Beck & Pollitzer, licensed wharfingers, forwarding and insurance agents, etc., London, England. This firm have large premises in London, and are in a position to quote low freight and through delivery for goods.

Later reports show that the damage to the works of the Jenckes Machine Co., at Sherbrooke, Que., by fire on the night of the 13th of August, was very much exaggerated. The fire was confined to the machine shop building, and the other departments, foundry, boiler shops, etc., were in operation as usual on the following Monday. A few days later a portion of the machine shop was started up, and the whole was in running order by the 23rd of August. The patterns, drawings and office records were preserved practically intact, and all orders for work are being accepted as usual. The principal item requiring replacement is the roof of the machine shop; this, however, is well under way. The whole of the work is being pushed with much energy, and the numerous orders in hand will suffer comparatively slight delay.

We are advised by Mr. Madison Williams, successor to Paxton, Tate & Co., Port Perry, Ont., that Messrs. H. R. Williams & Co., 345 and 347 St. James street, Montreal, have been appointed selling agents for his turbines, machinery, etc., for the city of Montreal and vicinity. Messrs. Williams & Co. are thoroughly acquainted with the various lines of machinery, and the addition of the well-known manufactures of Mr. Madison Williams should prove of great advantage to their present customers, and be an inducement to new buyers of mechanical goods. Mr. Williams reports the following recent orders: one 15 1/4" Vulcan turbine, for globe case, to Acadia Powder Co., Halifax, N.S.; one steel flume for Carveth & Cornish, Luskard, Ont.; two steel and cast iron draft tubes to Summerteldt Bros., Sutton, Ont.; one Lane circular saw-mill, with 25 ft. carriage and independent rope feed, to W. H. Keeley Lumber Co., Buckingham, Que.; one 30 1/2" Lefsel turbine to W. P. Widdfield, Siloam, Ont.; one 48" Lefsel turbine to Jos. Beausoliel & Son, St. Felix de Valois, Que.; three 61" Vulcan and one 35" Vulcan turbines to the Monastery of the Good Shepherd, "Moulin de Crochet," Parc Laval, Que., and one 40" Lefsel turbine to D. T. Creswell, Apple Hill, Ont., supplied through W. & J. G. Greey, Toronto. Mr. Williams also reports numerous enquiries from all parts of the Dominion.

PUBLICATIONS.

The Canadian Manufacturers' Association have begun the publication of a Bulletin, to be issued monthly, or oftener, as occasion may require, which will contain considerable information regarding the possibilities of the export trade of Canadian manufactures. This information is obtained from the Dominion Department of Trade and Commerce, and from the publications issued by the British and United States governments, and other reliable sources.

Cassier's Magazine for September contains, among others, the following articles: "General Distribution from Electric Central Stations by Alternating Currents," by Herbert A. Wagner; "The Cyanide Process of Treating Gold Ores," by Dr. Joseph W. Richards; "Speed as an Element of Warship Design," by Passed Assistant Engineer Walter M. McFarland, U.S.N.; "Projectiles for Modern Naval Ordnance," by Professor Ph. R. Alger, Bureau of Ordnance, U.S.N.

Mr. N. D. Seaman's saw and shingle mills in Keppe Township, near Owen Sound, Ont., were destroyed by fire on Sunday, 14th inst. The loss is \$3,000, with no insurance.

The DAKE STEAM FEED

Embodies the following Advantages:
SIMPLICITY OF CONSTRUCTION,
POSITIVE AND EASY MANAGEMENT,
ECONOMICAL USE OF STEAM,
SMALL SPACE OCCUPIED, CHEAPNESS,
EASY ADAPTATION TO EITHER NEW
MILLS OR THOSE NOW IN USE.

THE JENCKES MACHINE CO. - Sherbrooke Que.
Succeeding the PHELPS MACHINE CO., EASTMAN, QUE.

The movement of the engine in either direction is under the absolute control of the sawyer, thus accommodating the speed of the feed to the size of the logs. Mill men who have used other makes of Steam Feeds comment favorably on the economical use of steam of feed over others.
