

BLOOD AND THUNDER

Letters to the Editor reflect the views of our readers and not necessarily those of the Brunswickian.

Letters may be sent to Rm. 35, Student Union Building. Deadline: 5p.m. Tuesdays. Max. length 300.

One of them was one of us

Dear Sir,
I wish to commend you on your Frosh Issue's coverage of the Annual Shinerama campaign in the battle against Cystic Fibrosis. As your article quite clearly stated, the search for a cure has not been in vain. The work by Dr. Lap-Chu Tsui's research group (at Sick Kid's Hospital in Toronto) in mapping the location of the CF gene was a landmark achievement. The potential of their work in screening for this disease is enormous and therefore of great social and medical significance.

Those familiar with the field of medical genetics will attest to the difficulty of gene mapping - and rightly regard this work as being of great scientific importance as well.

My prime purpose in writing this letter is not merely to reinforce the "Canadian Content" of this discovery which your original article made clear but to give it a local angle. One of the main researchers in Dr. Lap-Chu Tsui's was Dr. Joanne Rommens of Port Elgin, N.B. who received her PhD from the Dept. of Chemistry at UNB in 1987.
