.....	.....	.....	.....	.....	.....	98	17	6

This Return would have been made at an earlier date but for the great amount of labour necessary to its preparation. One Clerk has been occupied with it for periods, the aggregate of which, when brought together, would amount to at least three months of constant labour, and the Book Keeper has been employed also, in the aggregate, more than a month in checking the calculations.

This additional amount of labour in an Office already pressed with work, has been a very serious inconvenience, and it is hoped that due allowance will therefore be made for the delay which has arisen.

Board of Endowment.

DAVID BUCHAN,  
Chairman.
