A NALYSIS OF MINERAL WATER OF Analysis of the Water of the Mineral Spring at Point di Jour, near L'Assomption, L infer that it will prove a valuable addition to those already discovered in Canada.

It appears to be well adapted to cases of scrofula, diseases of the skin, gout, rheumatism, and dyspeptic complaints generally.

Mineral Water to be useful should be taken for some time, and when it seems to loce its effect, that from snother spring should be substituted; and one not agreeing with an individual, another may act kindly and effectually. Weak and delicate persons should neak the advice of a physician with regard to the employment of these waters—it would be a great blessing to society if these productions from the laboratory of nature were to supersede the ville and heterogenous compounds, with which the world is cursed, under the name of "Patent Medicines."

Wn. Nerson, M. D. Montreul, 11th March, 1850.

Montreal, 11th March, 1890.

I certify that I have used the Point du Jour Spring Water in my practice, and have found it to act as a mild purgative and alterative. From the quantity of lodine it contains, it will, I doubt not, be found useful in acrofulous diseases and in some form of syphilis, in addition to ofher remedies.
