PUBLIC NOTICE

UNCLAIMED land warrants issued to members of the Red River Expeditions of 1870, 1871, 1872 and 1873, and to members of the North-West Mounted Police, are hereby given that warrants, entitling in each case the grantee or his assignee to a free grant, without actual residence or settlement duties, of a quarter section of Dominion lands, containing 160 acres, of the class open to homestead entry in the Province of Manitoba, Saskatchewan or Alberta, which were issued some years ago by the Department of the Interior for services rendered in connection with the Red River Expeditions of 1870, 1871, 1872 and 1873, or for service in the North-West Mounted Police, have not been delivered owing to the fact that they have not been applied for by the grantees and that their addresses are not known to the Department. The warrants in question will be delivered to the grantees or their assigns, upon satisfactory evidence being sent to the Secretary of the Department of the Interior, Ottawa, that the applicants are entitled thereto.

The undelivered warrants above referred to are the following:

Ottawa, 7th April, 1910.

P. G. KEYES,
Secretary.

SAYS EARTH IS ELASTIC.

Prof. Milne Declares That Tides Pull It Out of Shape.

London, April 21.—That the earth is elastic and pulled out of shape by action of the tides has been discovered by Prof. Milne, the leading English authority on earth phenomena. As the result of experiments he has found that twice in twenty-four hours, at high tide, the buildings along opposite sides of tidal basins "salute each other."

The experiments have been carried out at Bidston observatory, near Liverpool, one and a half miles from the sea, with a modified form of seismograph, designed to record tidal effects, and the more minute movements which other seismographs would not record. Photographically, a tilt on the pillar supporting it, causing a definite deflection on the film.

At high tide, the bed of the Irish sea became depressed from an increased load, and the effect of this was to pull the shores together. At low tide the amount of deflection was about equal to one inch in sixteen miles.

Prof. Milne, many years ago, showed that our ordinary and apparently stable English valleys opened when the sun fell upon them and contracted during the night. He also showed that apparently the whole of the Isle of Wight tilts up at high water, owing to the greater weight of the water in the English channel as compared with that in the Solent.

His latest work is the completion of earlier research, and tends to show that the earth is a great deal more elastic and responsive to pulls and strains than is commonly appreciated.

The change of aluminum fractional currency in France is being held up while scientists are trying to decide whether or not the value of the metal will drop as rapidly in the future as the past.

Wage-Workers' Symposium

PARAGRAPHIC RECORD RELATIVE TO THE TOPICS, PROCEEDINGS, EFFORTS AND LESSONS LEARNED BY THE WORKERS AS THEY PLAY THEIR PART IN THE WORLD'S GREATEST MOVEMENT.

The Carpenters' union at Vernon, B. C., has ceased to hold meetings.

Toronto District Trades council is considering the subject of publishing a labor paper.

There is less danger from stuffed ballot boxes than there is from stuffed voters.—John Cole.

"The dictator would turn back the tide of Socialism will find himself a general without an army."

The annual convention of the Brotherhood of Railway Clerks will be held at New Orleans, April 13-23.

The killed and disabled in British factories, etc., last year amounted to 328,981 persons—in 23 of those employed, 3,447 were killed outright.

What of the matrimonial "matches" made for the sake of money? What meaning is contained in such everyday expressions as "she married well?"

The dawn of the glorious day for labor will break when they vote to capture the lawmaking power and use it in their own interests.—Bellingham Journal.

Among Hearst's newspaper employees it is alleged that the unorganized employees of the Hearst newspapers have plenty of grievances which they never dare present.

The street railway employees' union of Vancouver, B.C., are quietly negotiating a new wage schedule which provides for a substantial raise. There are some five hundred men involved.

Organized labor of Oklahoma city has launched a movement to build a home where all the various labor unions can meet. The membership of organized labor in Oklahoma city has reached nearly 5,000.

"The election of a Socialist mayor and city government for Milwaukee should awaken the people of the United States to a realization of the fact that the Socialists are a political factor which must be reckoned with."—Kearl Harde.

Toronto carpenters have turned down an offer made by the builders' exchange to set the rate of wages at 35 cents per hour. The Brotherhood and Amalgamated men are working together in an effort to secure 40 cents an hour as the minimum rate.—Labor Page, Hamilton Herald.

If John Hendry, president of the Canadian Manufacturers' Association, sincerely believes that "our mechanics and working men are capable of looking after themselves" how does it come to be that he himself evidences such an interest in their welfare by attempting to disrupt international unions?

Very often the men who are loudest in their protest against women being granted the franchise, are not even voters themselves. Surely women could make no worse use of their votes than wage-workers have in the past. Neither men nor women are entitled to the franchise if they fail to demand it.

After the steel trust had murdered and crippled thousands of its employees, after it had blacklisted and hunted down every union man in its employ, and then ransacked the hidden corners of Europe for victims to be sent in beating wages below subsistence and increasing hours beyond endurance, it has now introduced a "welfare" scheme, with "profit-sharing" and other social lollipops and soothing syrup.—Daily Socialist.

Cut Out Overtime
For some years past the Vancouver Typographical Union has prohibited the accumulation of overtime. It must be given out to the first available "sub."

Calgary Leather Workers
The striking leather workers of Calgary, Alta., have submitted their dispute with one of the biggest employers to a local arbitration board, which convenes on April 25.

Union of Toronto Girls
Ed. Stephenson, a voluntary A. F. of L. organizer, of Winnipeg, at present in Toronto, has succeeded in organizing the Toronto Strip-tease girls, the membership of which is composed of girls.

Victoria Job Printers' Wages
Victoria, B. C., job printers have voted to go after \$27 per week, eight-hour day. The news printers' scale is \$15.00 per seven and one-half hour night.

National Socialist Convention
By a referendum vote of 5,000 to 2.

Heart Trouble Cured.

Through one cause or another a large majority of the people are troubled with some form of heart trouble.

The system becomes run down, the heart palpitates, you have weak and dizzy spells, a smothering feeling, cold clammy hands and feet, shortness of breath, sensation of pins and needles, rush of blood to the head, etc.

Whenever there are sickly people with weak hearts Milburn's Heart and Nerve Pills will be found an effective medicine.

"It is with the greatest pleasure I write to you to say that I have received by using Milburn's Heart and Nerve Pills, I suffered greatly from heart trouble, weakness and smothering spells. I used a great deal of doctors' medicines but received no benefit. A friend advised me to buy a box of your pills, which I did, and soon found great relief. I highly recommend these pills to anyone suffering from heart trouble."

Price, 50 cents per box or 2 boxes for \$1.25 at all dealers, or mailed direct on receipt of price to The T. Milburn Co., Limited, Toronto, Ont.

740, the membership of the Socialist party of the United States has decided to hold a national convention for the discussion of matters of policy in Chicago, May 15.

Vancouver Job Printers Wages
Vancouver, B. C., job printers have notified the printers' board of trade that after July 1 the scale will be \$4.50 per eight-hour day. The present wage is \$4. Increased cost of living is the argument advanced. Vancouver is an all-union town practically.

The Transition Period
The Revolution—it is the transition period, the passage from pure brute force and labor ordered by masters and performed by slaves with survival of the fittest, to the pure era of reason, mutual care and mutual love, with the survival of all. Such is the revolution, C. Osborne Ward.

Vernon Laborers Ask for Raise
During the past week the city workmen of Vernon, B.C., asked for a nine-hour day at \$2.75, an increase from 19 hours at \$2.50. The nine-hour day was granted at \$2.50. "A pretty small amount when compared with the cost of the necessities of life," observed Burt R. Campbell, a typist in the Okanagan Valley Capital.

A Forty-Eight Hour Week is Best
An agitation for a six day week of 48 hours would be more acceptable to Canada's wage-workers than the Lord Day Alliance efforts to secure "the Sabbath for the workers." The complex industrial system of to-day makes the later impossible. But the former movement is in harmony with the "eternal fitness of things."

International Social Congress
The executive committee of the International Socialist Bureau has decided upon the date and place for the meeting of the international congress. The congress will open in Copenhagen, Denmark, Aug. 25, and close Sept. 2, 1910. The place of meeting is the Concert Palace of the Odd-fellows' Palace, 28 Ibsen's Street.

Lethbridge Trouble Over.
A compromise between the striking members of the building trades of Lethbridge, Alta., and the builders' exchange has been effected, after a strike of two weeks. The carpenters gained the 50 cents an hour demand. The other trades secured half the raise asked for. The settlement was ratified by a referendum vote, though not unanimous.

The Strike at Frank
District 18, United Mine Workers of America, officials write: "All mine workers are requested to stay away from the mines of the Canadian Coal Consolidated company, Limited, at Frank, Alta., and do justice to your representatives and at least two senators in the state legislature after the fall elections. It is also expected that they will sweep the country as they did the city and that two congressmen will go to Washington."

Result in Milwaukee
Out party politicians are admitting that the Socialists as a result of their recent victory in Milwaukee stand a good chance of having over a dozen representatives and at least two senators in the state legislature after the fall elections. It is also expected that they will sweep the country as they did the city and that two congressmen will go to Washington.

Strikes Have Limitations
Unionists are rapidly learning that strikes, as a weapon for the enforcement of demands, have many limitations, and today an intelligent use of the ballot is coming into favor. It is being learned that when the federal or provincial government or municipal pallies—all elective bodies in fact—are influenced to set a standard as to the employment of men, employers must ultimately come up to that standard. The moral is obvious.

In Competitive Stage
The world is still in its competitive stage. Man is still contending with his blind egoism in the struggle for existence. It is not altruism or mutual aid, but the struggle for survival, and if his fitness to win the means of life prove insufficient he does not survive but perishes. Knowing this, he is too ready to apply his reason in the direction of selfishly-actuated cunning, and thus bring out a living reckless C. C. Osborne Ward.

New Policy Needed
What the Conservative party in Canada needs is not so much a good leader as a new policy. The laboring class is not so much a party as a movement, and there being no room for another party standing for the same thing—proprietary ownership of industry and natural resources—Conservatives find it difficult to frame up a platform that will be acceptable to wage-workers and at the same time conserve their own political hides. Hence the rapid growth of the Socialist party in Canada.

Mine Workers Object
Bellevue, Alta., miners refused to go to work because of too much gas. The company threatened to have them jailed. Nothing doing. Now says men shall not work in gaseous places, even when the fireboss's report makes no mention of the dangerous element. If they know positively that there is gas, the men wired the government inspector, and he is now on the ground and there is a hot time, as he has the reputation of carrying out the law to the letter.—A Fernie correspondent.

As a Yellow Dog
A committee of the American Federation of Labor appeared recently before the committee having in charge the bill for the creation of postal saving banks, but as the chairman of the committee is a banker, the committee from the American Federation of Labor was treated with about as much courtesy as a yellow dog. The arguments of the committee were met with sneers, and it was once more demonstrated that congressmen have but one respect for labor on its knees begging for legislation.—Miner's Magazine.

Expansion of A. F. & L.
The report of Secretary Morrison of the American Federation of Labor, for the five months of the present federation year, at the last meeting of the executive council, showed an increase in per capita tax for the same period over last year of \$1.40, indicating (Continued on page 11.)
