

Her Face Was Covered With Pimples

SHE GOT RID OF THEM BY USING BURDOCK BLOOD BITTERS

Miss T. Hunter, R.R. No. 8, London, Ont., writes:—"I wish to recommend Burdock Blood Bitters to all women who are suffering from pimples or any other facial blemishes. About two years ago I was greatly troubled with pimples and sores breaking out on my face, and could get no relief until, finally, a friend recommended me to take B.B.B. This I did, and I am now glad to say that your remedy has given me the desirable results, and I now have a nice smooth, clear skin, as it has eliminated all the impurities from my blood."

Get B.B.B. when you ask for it; it has been on the market for the past 40 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.—Adv.

CORNS

Lift Off—No Pain!

Doesn't hurt one bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers.

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the foot calluses, without soreness or irritation.—Adv.

The Inner Mysteries of Rheumatism

A remarkable book written by an authority who has spent more than 20 years of his life in study, research and experimentation in this distressing disease. One of the many new and startling facts which this distinguished writer clearly sets forth and proves that Uric Acid never did, and never can, cause Rheumatism—that Uric Acid is a natural waste product of our blood—found even in every newborn babe—and that without it we could not live.

Every sufferer of Rheumatism, Neuritis, Sciatica, Lumbago and associated disorders should read it. A limited edition is now being distributed free by the author, and fortunately anyone sending name and address to H. F. Newwater, 224 St. James St., Montreal, U.S.A., will receive a copy of this valuable book by return mail postage paid and entirely free of charge. If not a sufferer yourself, cut out this notice and help some afflicted friend by handing it to him.—Adv.

Radio Answers

By C. H. LANGFORD.

This department is conducted in this column each Saturday. Radio questions on troubles or information desired may be sent in. As many as possible of these questions will be answered in this column, except in cases where the writer is unable to do so. Address all communications to the radio department, London Advertiser, London, Ont.

Local radio fans will be glad to know that the radio research club of London is ready to help those who have trouble with any form of interference. In order that the listener may take advantage of this free service, all that is required is to go to any radio dealer and fill in a card specifying in detail the interference, actual description of the set, and the radio license number. In connection with interference from radiating regenerative receivers and others, both the owner of the set and the listener, who is annoyed by such, can secure a very helpful booklet containing information if application is made personally to any radio dealer. This booklet is free, and is well worth having to make a special aerial or else secure a 5 or 6-tube receiver.

R. M. of London, Ont., writes: I am informed that I should use a No. 4 wire from my lightning switch to the ground. Why should this wire be larger than the lead-in? Is it all right to connect this wire on the outside of the water meter? If this cannot be connected to a water pipe outside the house, is it safe to run it through the wall into the cellar, or could I bury a metal plate or rod and connect my lightning wire to this?

Ans.—While a number four wire is O.K., ordinary number 12 or 14 copper wire will do for the average lightning protector system. Never connect your lightning ground to the house side of the meter. If you cannot connect on the street side, then use a regulation ground rod, driven directly below the lead-in wire. For a more elaborate ground and one that would do well for receiving also, is to secure a piece of sheet copper at least 18 inches square. Look around and pick a spot near the lead-in wire. This spot should be one that is likely to remain damp, even in dry or hot weather. Dig a hole three or four feet deep in order that the copper will be in contact with the earth. In connection to make the ground hold its moisture better it is advisable to dump a bag of charcoal into the hole, so that it is packed about the copper sheet. Be sure that a heavy copper wire is well soldered to the copper plate before it is buried. Pour a few pails of water into the hole and then fill in the early packing it down well. This ground will give good results for both receiving or for a lightning ground. It is better practice to have a separate ground connection for lightning arrester, other than one for receiving ground.

C. G. of London, Ont., writes: Can receive concerts with an aerial 20 feet long, two stories above the ground? The aerial will be closed in by a number of buildings.

Ans.—You will get some concerts, but you will either have to make a special aerial or else secure a 5 or 6-tube receiver.

C. K. of St. Thomas, Ont., writes: I am building a four-tube receiver. In order to keep my battery properly charged I am told that it must be taken to a charging station for recharge. Why can't I use four gravity cells, commonly called croft-foot cells? I have a limited amount of money to spend.

Ans.—The best thing to do is to purchase a reliable battery charger. This can be attached to a hydro socket in your home and the battery can be recharged without trouble and at a cost of only a few cents. Using the croft-foot cells would be unwise, as they do not possess a large capacity for filament lighting. Stay with the storage battery. Better results will be obtained by using a used four or five any other form of filament lighting supply.

F. W. of Chatham, Ont., writes: Will you kindly answer the following questions on the Reinartz circuit? I wonder why my set so dead after connecting on to a charging station? What I do to eliminate body capacity? Would it be possible to connect a second Reinartz amplifier web coil for long-distance reception? Would one stage of amplification help bring in distant stations when using head phones?

Ans.—In this type of Ultra Audio circuit, due to peculiar regeneration control and necessity for proper frequency current at phones, what a phone condenser is placed across phones or transformer are connected and kills the necessary action of choking. Shielding of the panel will eliminate capacity effects. However, the Reinartz circuit is not bothered by extreme capacity troubles and can be made entirely free from such effects by changing connections slightly in the set, so that the roots of both tuning and regeneration condensers are connected to ground. If this fails, something is variable wrong in your circuit. A cheap no tune condenser with composition and plates often gives considerable trouble. No tune to lower wave stations, make a connection say ten or fifteen turns down the coil from the grid connections and Ont.—Adv.

PIANO JAZZ

Wonderful course teaches: Ear, Piano Playing, Blues, Negro Harmony, Playing Piano Effects, Novelty Chords, etc. You can learn at home. Drop a card for interesting literature to PIANO BILL, Sta. C, TORONTO, CAN. t-r

Oh Gosh! It's The Car Now and Honeymoon Is Ended

CANCER TAKES 125,000 LIVES IN U. S. IN YEAR

Dr. Francis Wood Declares It Is Neither Hereditary or Communicable.

New York, April 10.—Cancer takes an annual toll of 125,000 lives in the United States, and causes an economic loss of \$25,000,000 a year, Dr. Francis Carter Good, director of the Institute of Cancer Research at Columbia University, asserted in a report submitted today to the Gorgas Memorial Institute of Tropical and Preventive Medicine. Of this number, probably 15,000 lives could be saved annually if cancers were treated by reputable physicians within a few weeks of formation, he estimated.

"So far the only adequate treatment for cancer is surgery," Dr. Wood said.

"Cancer is not hereditary nor is it contagious or communicable," said Dr. Wood.

UNSURPASSED FOR CHILDHOOD AILMENTS

Mrs. Howard King, R. R. No. 5, Truro, N. S., says: "I am the mother of four children, and have always used Baby's Own Tablets when any of them needed a medicine, and I can say they are guaranteed absolutely free from any injurious drugs. They are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.—Adv.

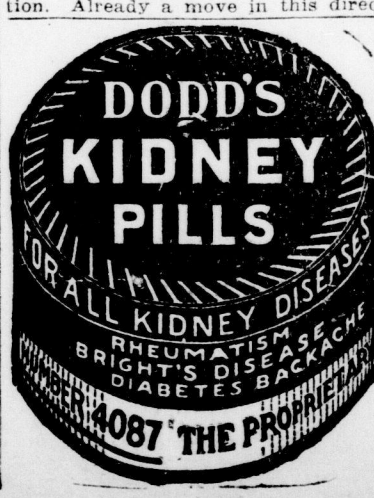

The law delayed the honeymoon of Martin Smith of the United Typewriter Company, but it could not stop it. It took a broken part on his automobile to stop Mr. Smith from having a lengthy honeymoon.

Tuesday Mr. Smith was scheduled to be married. It so happened that Mr. Smith was testifying in a law suit started by his firm against the Chatham Gas Company. The evidence could not all be taken on Tuesday and Mr. Smith found it necessary to postpone his honeymoon until the next day or later. The marriage took place Tuesday night, however. Thursday morning Mr. Smith and his bride left the city on the delayed honeymoon. When he left the city his car was running in great order. It continued to do so until it reached Brantford; then it stopped. The part which caused all the trouble could not be replaced, so Mr. Smith, him, and he brought his bride and himself back to London, and the honeymoon was called off, although he swears he is going on the proposed trip some day.

SIR W. GLYN JONES COMES TO LONDON

Distinguished British Pharmacist Will Give An Address Next Thursday.

London will have a distinguished visitor on Thursday, April 16, in the person of Sir William Glyn Jones, noted British pharmacist, who is making a coast to coast tour of Canada. Sir William, who will be the guest of the London Druggists' association at the Hunt club, on Thursday, has been brought to Canada by the Dominion Pharmaceutical association in the interests of price protection. Already a move in this direction has been taken by Great Britain, Australia and South Africa.

DOROTHY ELLINGSON REMOVED TO ASYLUM

San Francisco, Calif., April 10.—Seventeen-year-old Dorothy Ellingson, the pretty bronze-haired girl whose pursuit for jazz and joy culminated last January in a quarrel in which she killed her mother in a bedroom of her home, was taken to the state asylum at Napa, California, last night.

The jury impaled to try the murder charge was dismissed until Monday, and will be formally dismissed then, and the matter placed on the "deferred" calendar, perhaps for all time. Should she ever be pronounced sane, the murder charge may be revived.

THOMAS STONEMAN DIES.

Thomas Stoneman, a native of Perth county and a resident of Mitchell, died in the city yesterday. He was 66 years of age.

Mr. Stoneman was one of the pioneer undertakers of Western Ontario, and conducted a business in Mitchell at the time when coffins were made to order and to particular measurements.

Survivors were the widow, two sons and four daughters.

The remains have been forwarded from the funeral home of A. L. Oatman to Mitchell, where interment will be made.

LOW-COST TRIP TO PACIFIC COAST.

A captivating four-week tour of Western Canada and the Pacific coast, with a trip through the United States on the return journey, is being planned for Canadian teachers and their friends this summer.

Those who take advantage of this trip will see the greatest scenery on the continent—the Buffalo herd at Watkinsburg, Jasper National Park, with its unsurpassed mountain scenery, Mount Robson, the highest peak in the Canadian Rockies; the totem poles of Kitwanga, and the mystic beauty of the Skeena river.

At Prince Rupert the party transfers from train to boat for the glorious water trip of 750 miles through the sheltered scenic zone of the North Pacific coast to Vancouver, Victoria and Seattle.

On the return trip five wonderful days will be spent touring Yellowstone National Park by motor, with a trip to Salt Lake City, and three days at Rocky Mountain National Park, Colorado. Then it's Denver, Clear Creek Canyon, Idaho Springs and Lookout Mountain, before heading for Chicago and Toronto.

The tour leaves Toronto July 9th, and cannot afford to miss it. Full information, fares, etc., can be secured with illustrated booklet from A. E. Bryson, 44 Silverthorn Ave., Toronto, Martin Kerr, 4 Beulah Ave., Hamilton, or any Canadian National railway agent.—Adv.

RUSH FLOUR ORDER.

Port Colborne, April 10.—The Maple Leaf Milling Company, Limited, here are rushing through their big Russian flour order, two special trains of 99 cars of this flour being shipped yesterday and 100 cars today, making a record shipment for the past two days.

MAN DIES AFTER DRINKING GLASS OF DEADLY CYANIDE

Montreal, April 10.—Mistaking a deadly cyanide for soda water Andre Giroux, aged 60, one of the partners in the Royal Silver Plate Company, Craig street west, accidentally caused his own death, it was revealed at an inquest held by Coroner McMahon. Giroux was found dead in his laboratory by an employee yesterday.

One containing cyanide and the other containing soda water, were found alongside an opened package of sandwiches.

COMMERCIAL TRAVELLERS HAVE EUCHE TONIGHT

The United Commercial Travellers and ladies' auxiliary are holding a euchre tonight in the I. O. F. lodge rooms in the Imperial Bank building. Members and their friends are invited and a splendid program has been planned to give all a good time.

THE SPARK PLUG

Vitamins to nourishment are what a spark-plug is to a motor. To sustain vitality, the body needs three thousand calories of food daily, yet if this food is not activated by vitamins the body is unable to thrive in health or strength.

Scott's Emulsion

brings to a weakened system vitamin-activated nourishment of highest degree. A little taken regularly helps wonderfully to build strength and resistance.

If you would keep strong and vital—activate your diet with Scott's Emulsion.

Scott & Bowne, Toronto, Ont.

RADIO

TODAY'S LIST

SATURDAY, APRIL 11.
(Eastern Standard Time.)
WEAF, NEW YORK—491.5.
6 p.m.—Vocal orchestra.
7 p.m.—Synagogue service.
7:30 p.m.—Pamela Todd, soprano; Maurice Strickland, Richard, pianist; Huyler Four; Vanstan Lee, baritone.
8 p.m.—Waldorf concert orchestra.
9:45 p.m.—Easter program.
10:35 p.m.—Pan-American trio.
11 p.m.—Vocal orchestra.
WJZ, NEW YORK—484.3.
7 p.m.—Astor Grill orchestra.
8 p.m.—Savoy's harp ensemble.
8:30 p.m.—Talk; W. O. Bell, tenor.
9 p.m.—Maria Carveras, pianist.
10:30 p.m.—Waldorf dance orchestra.
WNYC, NEW YORK—526.0.
6:30 p.m.—Waldorf dance orchestra.
7:35 p.m.—The Chateau Four.
