Regular days in Berlin and Guelph. Electric Massage for wrinkles, etc. Address (Miss) A. Graduate, Box 169, Brampton, Ont.

Things Learn The News

SENSE OF SMELL HIGHLY DEVELOPED IN ANIMALS—BIRDS OFTEN GIVE WARNING.

MANY ANIMALS CAN RECOGNIZE MAN ONLY WHEN HE MOVES ABOUT.

The dwellers of the forests and fields are well informed about the news in their immediate neighborhood. Men tell each other what they saw. If the animals could talk they would tell each other what they smelled and heard.

The sense of smell is the great news gatherer for such small woodland creatures as mink, weasel and fisher. They can look ahead only a few feet or a few inches in the brush or grass, where they generally hunt or are hunted, and their sense of sight has remained dull. Even larger animals such as foxes, wolves, wild and domestic dogs depend on the sense of smell to a remarkable degree and this sense is so highly developed that no man would believe it if he had not all observed it. A dog or wolf knows by scent, not that some other dog or wolf has called at a certain corner, but he knows even what particular individual among his acquaintances has called.

A magazine writer says: A small pug that I used to keep in the house, lived on terms of permanent war with a mongrel farm dog. Whenever I had touched the mongrel or been near him, the little house pug would snuffle and bark at the scent of his enemy as soon as he sniffed at my hands or clothing. My spotted fox terrier sometimes passes me at a distance of a few rods without recognizing me by sight; but I cannot lose him if he finds my tracks. He follows me as readily when I wear rubber boots as when I go out in common leather shoes. My water spaniel once cornered a rabbit near an old fence. The wind was coming wrong for the dog, and he gazed up within two feet of the rabbit without seeing him. At last the rabbit made his escape by jumping right over the dog. Even the largest game animals like deer and moose depend much more on their noses and ears than on their eyes for getting the news of the woods. Again and again I have quietly roamed toward a big bull moose. His small eyes stared at me but he could not make out what I was. But never did I approach close to one which got my wind. At the distance of half a mile his nose told him I belong to a dangerous gun-bearing race.

Several kinds of birds act as purveyors of the news to the four-footed animals. No sooner does the crow spy a hunter, than it begins to utter a loud "caw, caw, caw." Every wild creature understands that language as meaning: "Something strange."

CRUEL BACKACHES.

The Trouble Usually Due to Poor Blood—Dr. Williams' Pink Pills the Cure.

There is a common notion that backache is a sign of kidney disease, but this is absolutely wrong. Not one backache in a thousand has anything to do with the kidneys. Hundreds of people die of kidney disease who never had a backache—and hundreds who suffer continually from backache have nothing wrong with their kidneys. By far the most common cause of backache is muscular rheumatism. Nearly all the rest of the backaches are due to weakness and poor, watery blood, as in the case of growing girls and women, to those secret ailments that make the lives of so many of that sex miserable. Don't let a backache frighten you into the belief that you have kidney trouble. What I really need to cure the average backache is a tonic, blood-building medicine, and Dr. Williams' Pink Pills are the greatest blood-making medicine medical science has yet discovered. Every dose actually makes new, rich red blood, thus curing such common ailments as anaemia, headache, backache, neuralgia, rheumatism and the ailments of girlhood and womanhood. Mrs. W. Gee, Strathcona, Alta., writes: "I suffered from backache, anaemia, I was completely run down and was tortured with headaches and backaches and dizzy spells. I doctor for a long time but was no better than when I began. Then I began to take Dr. Williams' Pink Pills and they completely restored my health." Get the genuine pills with the full name, "Dr. Williams' Pink Pills for Pale People," on the wrapper around each box. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from the Dr. Williams' Medicine Co., Brockville, Ont.

which is the same as something probably dangerous. The bird jays have similar habits, and scream at the sight of any intruder on woodland dwellers. Certain danger calls of animals are well understood by young and old. After a buck has caught the hunter's wind and has uttered his sharp snorting whistle, no experienced hunter will wait for the deer to show themselves. In the language of the street: "they are onto him and the game is up."

Animals gather much news by watching others of their kind. One day I saw many moose, and roved a race up the chain of northern lakes. The next day there was not a moose to be seen on any of the lakes of the whole region; they all had learned of the news and stayed in the silent forest. On a canoe cruise in the wilds of Minnesota I chanced upon a line back

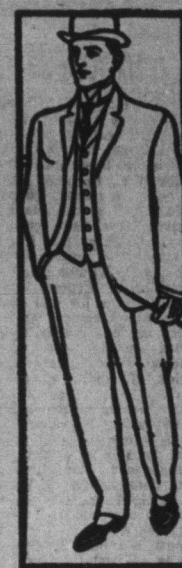

IS HANDSOMEST LOOKING

IMPROVEMENT NUMBER FOURTEEN

A handsomely attired pair of masculine feet are as scarce as radium. Never thought of it, did you? Well, it's a fact. Next time you're at the club inspect the feet of exquisitely dressed men. You'll find hardly one smartly dressed foot. There'll be plenty of gaudy shine and polish, but clumsy fits, unbecoming shapes, bowed up and warped soles, wrinkles and all sorts of bad taste and slovenliness. Astonishing situation when you consider that the style of a Hundred Dollar suit is converted to slovenliness when hung over slouchy boots. Here is a recipe for making a pair of handsomely dressed masculine feet. Call on the Foot-rite retailer in your town. His name's below. His door swings inward but never outward to find a more welcome store. Allow him to select several pairs of Foot-rites of different shapes and styles and let him do the selecting. He's a shoe expert and knows better than you what best becomes you. Wear one pair keep the others on trees, change daily and shine daily with a dull finish and you'll have well groomed and admired feet.

Appearance ruined by slouchy shoes

Appearance enhanced by dressy Foot-rite

But why get Foot-rites because they're handsome? They're wrinkleless and are built with uncollapsible box toes. This gives a smooth, dressy, kid glove sort of upper. They're built with a Plumb-Line Level Heel and Sole, and artistic arch. This gives the most pleasing base line ever put into a shoe, and their tough heels, steel arch support and unwarpable soles force the base line to "stay put."

Besides, they're made of Normal-Calf, an exclusively Foot-rite leather. This leather, being almost as soft and supple as the calf's live skin, finishes like silk and yields an ebony lustre when blacked or polished. Finally, they're molded over lasts sculptured from the ideally formed feet of model athletes, which give them new, original, and exquisitely handsome shapes—shapes that you can't get in any other shoe—shapes that'll make your feet feel proud. Anywhere in America, Canada or Great Britain—\$4.00 and \$5.00. Every Pair Goodyear Waxed.
