Why should any other cereal be called "just as good" as

# Kellogg's

## CORN FLAKES

Because Kellogg's is known to be the best and most nutritious cereal on the market—  
Because the sale of Kellogg's Corn Flakes is enormous as trade returns will show—  
Because another large modern factory, the best and most sanitary in Canada had to be built to take care of our constantly increasing trade—  
Because the imitator, knowing these facts and having few selling arguments for his own product thinks to create a market for it by comparing it to Kellogg's:  
But---the flavor and the sustaining qualities of Kellogg's Corn Flakes cannot be counterfeited. Sold in big packages at 10c. Look for the signature.

## WILL ORGANIZE LUMBER PROTEST

Association to be Revived and Government Asked to Modify Legislation

The Lumbermen & Limit Holders' Association of New Brunswick is to be revived if the plan outlined at a meeting of provincial lumbermen in the Royal hotel St. John on Monday, are carried out. A committee will arrange the details and the reorganization meeting will likely take place in Newcastle during the last week in June.

Hon. John P. Burchill, of Nelson, who was president of the organization several years ago, said that timber limit leases were discussed, but no action will be taken until after the meeting of the association.

The visiting lumbermen did not remain over to present their case to the government meeting, as was expected might be done, but after the organization meeting the government may be approached at their July meeting. The chief object of the association is understood to be the securing of better terms for renewal of crown land leases, which expire in 1918, than those outlined in the recent act by which a bonus for renewal is required.

Among the outside lumbermen attending the meeting were: Hon. John P. Burchill, Nelson; R. A. Lawlor, of Chatham; Allan Ritchie, William M. Sinclair, A. Kulinder, James A. Rundle, and David J. Buckley, of Newcastle; Angus McLean, Bathurst; F. D. Swim, Doaktown; C. S. Hickman, Dorchester; Sheriff John O'Brien, Nelson; James Robinson, Miramichi; J. W. Brankley, Chatham; C. L. Fenderson, Jacquet River, and John Kilburn, Van Buren. In addition to these gentlemen, local lumbermen were also present.

## LIVED LIKE A LORD

Importers Six Months' Penance for a Round of Champagne Dinners

How a man worth nothing contrived to live at the rate of \$10,000 a year was related by the chief constable at Lincoln Police Court, when Arthur Lionel Ashton, aged twenty-seven, was charged with obtaining food and lodging from the Waverley Hotel, Lincoln, by false pretences.

"I have never encountered a man before with such self-assurance," added the chief constable. "He is a man of considerable education and quite an accomplished criminal. He has defrauded twenty hotels at least in Liverpool."

The evidence showed that the accused invariably represented himself as Ernest Shand, the comedian. He arrived at the hotels in hired motor cars, had the best of everything, and gave champagne dinners to his acquaintances.

At one hotel he robbed the box for the Commercial Travellers' Children's School. He was first convicted in Ireland, and had been deported from Canada for false pretences. Sentence of six months' imprisonment was passed.

## MILITANTS BEGAN A HUNGER STRIKE

Say They Will Compel The Authorities to Release Them

LONDON, June 18.—The six leaders of the militant suffragette organization who were sentenced to long terms of imprisonment on a charge of conspiracy at the Central Criminal Court yesterday, began a "hunger strike" immediately after reaching the jail. These prisoners, Miss Harriet Kerr, Miss Agnes Lake, Miss Rachel Barrette, Mrs. Beatrice Saunders, Miss Annie Kenney and Miss Laura Lennox declared when sentence was pronounced, that they would refuse to eat and would compel the authorities to release them.

It is now well known that not more than one case of rheumatism in ten requires any internal treatment whatever. All that is needed is a free application of Chamberlain's Liniment and massaging the parts at each application. Try it and see how quickly it will relieve the pain and soreness. Sold by all dealers.

## A WARLIKE PRINCE

The Kaiser's Son Started Berlin With His Book

Something like a sensation was caused in Berlin by the publication by the German Crown Prince of a book called "Germany in Arms." The book, which is "most reverently dedicated to the German Emperor and the Prussian King," contains the following motto: "The world does not rest more safely on the shoulders of Atlas than does Germany on her army and navy."

The Imperial editor asserts that Germany, more than any other land, has to trust to its armaments, and that as its geographical position is unfavorable, and as all nations do not regard Germany with affection, the country has the sacred duty imposed on it always to maintain its army and navy in a state of readiness. "Only in this way, relying on our good sword, can we maintain that place in the sun which is ours, but which will not be voluntarily conceded to us."

The Crown Prince goes on to say that diplomacy may delay the conflict for a season, but those in responsible positions must know that once a gigantic conflagration is lighted it is not so easy to extinguish.

Speaking of the delight of riding to an attack, the Prince says there is one delight still greater—namely, that of meeting the enemy at the end of the gallop, and the fight for life and death.

## TANNING BY ELECTRICITY

Better Leather is Produced in Much Shorter Time

A new electric tanning process, invented by the Swedish scientist, Dr. A. Groth, and applied on a practical scale in an English works, is attracting much attention, and one of the prominent electrical firms is to take it up for commercial use. With this method, the hides are put in special vats along with metal conductors, so as to carry out an electrolytic action, and this will tan the hides in much less time than usual, for instance, six weeks as compared to several months. Leather of better quality is produced in this way, and the method gives a perfect and solid tanning. Various electrical devices in the shape of regulators, also safety apparatus for over-current, make the process almost an automatic one.
