

PRESCRIBE
LISTERINE

FOR PATIENTS WEARING
BRIDGE WORK OR DENTURES,
AND AS A GENERAL

Antiseptic and Prophylactic Wash

FOR THE MOUTH AND TEETH.

LISTERINE is kept in stock by leading dealers in drugs everywhere, but in consequence of the prevalence of the **SUBSTITUTION EVIL** we earnestly request **DENTAL PRACTITIONERS** to

PRESCRIBE LISTERINE IN THE ORIGINAL PACKAGE.

LISTERINE is invaluable for the care and preservation of the teeth. It promptly destroys all odors emanating from diseased gums and teeth, and imparts to the mucous surfaces a sense of cleanliness and purification; used after eating acid fruit, etc., it restores the alkaline condition of the mouth necessary for the welfare of the teeth, and employed systematically it will retard decay and tend to keep the teeth and gums in a healthy state. **LISTERINE** is valuable for the purification of artificial dentures and for the treatment of all soreness of the oral cavity resulting from their use. Patients wearing bridge work should constantly employ a **LISTERINE** wash of agreeable strength.

LISTERINE is used in various degrees of dilution; one to two ounces of **LISTERINE** to a pint of water will be found sufficiently powerful for the general care of the deciduous teeth of children, whilst a solution composed of one part **LISTERINE** and three parts water will be found of agreeable and thoroughly efficient strength for employment upon the brush and as a daily wash for freer use in the oral cavity, in the care and preservation of the permanent teeth.

LITERATURE DESCRIPTIVE OF **LISTERINE** MAY BE HAD
UPON APPLICATION TO THE MANUFACTURERS,

LAMBERT PHARMACAL COMPANY,
