A REPRESENTATIVE & CHAMPION OF AMERICAN ART TASTE! Prospectus for 1876-Eighth Year.

ALDINE, THEThe ART JOURNAL of America.

ISSUED MONTHLY. "A Magnificent Conception Wonderfully carried out."

The necessity of a popular medium for the representation of the productions of our great artists has always been recognized, and many attempts have been made to meet the want. The successive failures which so invariably followed each attempt in this country to establish an art ournal, aid not prove the indifference of the pecyleof America to the claims of high art. So soon as a proper appreciation of the want and an ability to meet it were shown, the public at once railied with enthusiasm to its support, and the result was a great artistic and commercial triumph—THE ALDINE.

THE ALDINE, while issued with all the regularity, has none of the temporary or timely interest characteristic of ordinary periodicals. It is an elegant miscollancy of pure, light and gracefullitorature and a collection of pictures, the rarest specimens of artistic skill, in black and white. Although each succeeding number affords a fresh pleasure to the friends, the real value and beauty of THE ALDINE will be most appreciated after it is bound up at the close of the year. While other publications may claim superior cheapness, as compared with rivals of a similar class, THE ALDINE to the proper and ongravings in any other shape or number of volumes for ten times its cost, and time, there is the chrono, besider!

The batiopal feature of THE ALDINE must be taken in no parrow sense. True art is cosmopolitan.

The national feature of THE ALDINE must be taken in no narrow sense. True art is cosmopolitum. White THE ALDINE is a strictly American institution, it does not confine itself entirely to the reproduction of native art. Its mission is to cultivate a bread and appreciative art taste, one that will discriminate only on grounds of intrinsic merit. Thus, while placing before the patrons of THE ALDINE, as a leading characterist, cithe productions of the most noted American artists, attention will always be given to specimens from foreign masters, giving subscribers all the pleasure and instruction obtainable from home or foreign sources. The artistic illustration of American scenery, original with THE ALDINE, is an important feature, and its magnificent plates are of a size more appropriate to the satisfactory treatment of details than can be afforded by any inferior page. The judicious interspersion of landscape, marine, figure, and animal subjects, sustain an unabated interest, impossible where the scope of the work confines the artist too closely to a single style of subject. The literature of THE ALDINE is a light and graceful accompaniment, worthy of the artistic features, with only such technical disquisitions as do not interfore with the popular interest of the work

Among the great discoveries of modern science, fow are of more real value to mankind than this effectual remedy for all discases of the Throat and Lungs. A vast trait of its virtues, throughout this and other countries, has shown that it does surely and effectually control them. The testiment of our best citizens, of all classes, establishes the fact, that Chenry Perforant will and does relieve and cure the afflicting disorders of the Throat and Lungs beyond any other medicine. The most dangerous affections of the Pulmonary Organs yield to its power, and cases of Consumption, cured by this preparation, are publicly known, so remarkable as lardly to be believed, were they not proven beyond dispute. As a remedy it is adequate, on which the public may rely for full protection. By curing Coughs, the forerunners of more serious disease, it saves unnumbered lives, and an amount of suffering not to be computed. It challenges-trial, and convinces the most sceptical. Every family should keep it on hand as a protection against the early and unperceived attack of Pulmonary Affections, which are easily met at first, but which become incurable, and too often fatal, if neglected. Tender lungs need this defence; and it is unwise to be without it. As a safeguard to children, amid the distressing diseases which beset tine Throat and Chest of childhood, Chenry Pretoral is invaluable; for, by its timely use, multitudes are reseued from premature graves, and saved to the love and affection centred on them. It acts speedlify and surely against ordinary code, seeding sound and leaith-restoring seep. No one will suffer troub, seem they know how easily they can be cured.
