

Comment

The Mathematics Department prefers the early hours, so we were told, and the placing of the 1st course at 9 o'clock was unofficially approved before the first formulation appeared for comment.

The Science Departments were anxious for the early hours, -- all of them. Unfortunately there are not enough of them.

The Committee does not consider that the final paragraph is entirely ~~is~~ justified.

Mathematics is not changed in final time table draft, and Dr. Sullivan's verbal comment was most satisfactory.
