Hats are not all alike. Not only do makers differ in their "blocks" for the season, but there's a sharp selection necessary among the styles

offered by each maker. You not only get a good hat,

but a style selected by a hatter with an

eye for shape.

Sportsmen Think Different Policy Should Be Followed to Preserve Forest Reserve. A special correspondent of The Deoit Tribune writes as follows from igonquin Park. Ont.: Sportsmen and men to whom the

veauties of nature appeal strongly are vondering at the seeming failure of the provincial government of Ontario to realize the possibilities of Algonquin National Park, or at least to protect it as they believe it should be protected. They declare that unless there is an awakening in the near future this beauty spot of Canada will be marred beyond repair by the ax of the lumber-man.

man. Algonquin Park, it may be explained for the benefit of those who are not well informed on the geography of the Do-minion, lies some 200 miles to the north or Toronto in what are known as the Highlands of Ontario. It has an area of over 1,100,000 acres, and its average elevation above sea level is about 1000 feet, while several hills, or perhaps they should be called mountains, rise to 2000

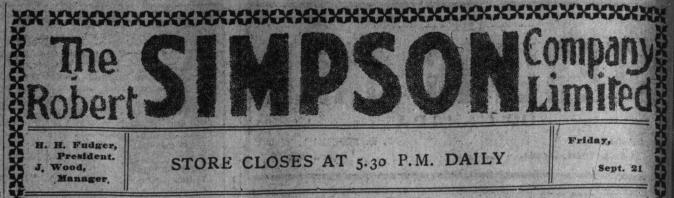

feet. Within its confines are some 1200 lakes and streams. The lakes are deep and clear and abound with bass, salmon trout and speckled trout. The streams also furnish great sport to the fisher-men. In the woods are deer in the greatest abundance, and moose, beaver and otter are also comparatively com-mon.

mon, Lovers of nature who have traveled America from one end to another de-scribe it as one of the most beautiful regions the new world possesses. The climate is magnificent; the scenery charming and impressive, and here, only a few hours' run from the capi-tals of the Dominion and of Ontario, one may bury himself in a forest almost primeval.

one may bury himself in a forest almost primeval. Outside of Park Superintendent Bart-lett and his staff of fourteen rangers and a few others, located at Algonquin Park, on Cache Lake, in the southern part of the park, and a comparatively small number of campers and tourists, the only inhabitants of the reserve are the employes of the lumber barons. To make the situation clearer, it should be explained that the leases held by the companies were taken out before the park came under the control of the gov-ernment of Ontario, twelve years ago. Some ten or twelve companies hold leases within the park, among them be-ing A. Barnet & Co. of Renfrew, the Brennans, the St. Anthony Lumber Company, McLachlin Bros, the Hawkes-bury Lumber Company, J. D. Shier of Bracebridge, Mickle, Dyment & Co. of Gravenhurst. and Heath, Tate & Turn-bull of Huntsville.

Gravenhurst. and Heath, Tate & Turn-bull of Huntsville. These concerns cut the big pine off their holding several years ago, and for some seasons have been doing com-paratively little work in the park, but now with the increased price of lumber and the demand for hardwood they are beginning to cut the birch, maple and other hardwood. will Mar Park.

Sportsmen who have visited the park do not believe this should be allowed,

# Are Your Clothes Genuine--or a Sham?

The most famous philosophy of clothes ever written dealt largely with the exposure of shams. How many men of to-day recognize the clothing-shams that are parading themselves before the public eye? Have you seen the ready-made suit that is as good as the tailor-made? or the domestic fabric that is better than the imported? No permanent or responsible business organization can afford to notice such shams. If a man wants a suit specially cut for himself by an expert tailor, we can supply him with it at a comparatively low price. If a man wants clothing that is ready-to-wear we can give it to him for about half that low price, and it will be straight honest clothing, sold close to the cost of production, and nothing extra for sham. Here are some examples.

"Consider the thousands to get trying to make the trains, trying to get to the boats, or trying to get back from the races. Consider the thou-sands that we carry between 5 and 6.30. "It's not going to be repeated. The Toronto Raliway has the right, and I not do in future, to operate the cars. A. W. Almon. barrister, Haldfax, on behalf of Mary Beatrice Spain, the defendant's wife, understood to be residing in New York, is suing for \$1260. She asserts that since their separa-tion, in January, 1906, she was to get an annual allowance of \$840. She also further claims \$4250 alleged to be ow-ing, as she paid insurance premiums for her husband and lent him money. She asserts that the titransaction

ber should be left standing. Altogether separate from the question of the scenic beauty of the park there is the problem of water power. It has been estimated that the streams having their rise in the park furnish annually an aggregate

water-power equal to that which would be produced by burning 1,500,000 tons of coal. Should the timber be cut tons of coal. Should the timber be cut off, it is asserted, the streams in the park will be dried up, the lakes lowered, and the water-power on the lower river systems seriously impacted seriously impaired.

Lumbermen's Plea. Lumbermen's Plea. The lumbering interests, of course, look at it from a purely business stand-point, and say they merely ask for their rights. Aside from the question as to whether they have not already cut all the timber they expected to get when the leases were granted, it is pointed out that the government could better afford to pay them an indemnity than have several rivers having their rise in have several rivers having their rise in the park ruined for water-power pur-

the park ruined for water-power pur-poses. And the sooner the companies are bought off, if this must be done, the better, as in a few years their rights, such as they fare, will be even more valuable than now. Another grievance held against the lumber interests he found Another grievance held against the lumber interests by friends of the park is the flooding of the streams for damming purposes and allowing the water to remain at the high mark for so long a time that much timber along the edges of the lakes and streams is
