Gas in the stomach
IS DANGEROUS

Recommend Daily Use of Magnesia To
Overcome Trouble Caused by Fer-
menting Food and Acid
Indigestion.

Gas and wind in the stomach accom-
panied by that full bloated feeling after
eating are almost certain evidence of the
presence of excessive hydrochloric acid
in the stomach, creating so-called "acid
indigestion."

Acid stomachs are dangerous because
too much acid irritates the delicate lining
of the stomach, often leading to gastritis
accompanied by serious stomach ulcers.
Food ferments and sours, creating the
distressing gas which distends the stom-
ach and hampers the normal functions
of the vital internal organs, often affect-
ing the heart.

It is the worst of folly to neglect such
a serious condition or to treat with ordi-
nary digestive aids which have no neu-
tralizing effect on the stomach acids. In-
stead get from any druggist a few ounces
of Bismarck Magnesia and take a tea-
spoonful in a quarter glass of water right
after eating. This will drive the gas,
wind and bloated right out of the body,
sweeten the stomach, neutralize the ex-
cess acid and prevent its formation and
there is no sourness or pain. Bismarck
Magnesia (in powder or tablet form—
never liquid or milk) is harmless to the
stomach, inexpensive to take and the best
form of magnesia for stomach purposes.
It is used by thousands of people who
enjoy their meals with no more fear of
indigestion.
