

Notice.

THE Subscriber returns his sincere thanks for the liberal support received from his friends in the City and country, since his commencement in business; and wishes to inform the public in general, that having constantly on hand materials of the very best description, he is prepared to execute all orders in his line with neatness and dispatch, and hopes by attention and moderate charges to DESERVE and RETAIN that patronage for which the establishment now under his charge, has always been noted.

November, 1841.

The New Vegetable Antibilious Pills.

ARE the original invention of Dr. T. E. Jeans, surgeon to the General Mining Association, at Sydney, CB; and have been used with such eminent success in his private practice for a long period that he is induced to publish them for the benefit of sufferers from Bilious, Gouty or Nervous Affections. Head aches, Costiveness, and Flatulencies, so commonly arising from crude or accrimonious humours. They will be found surprisingly certain and efficacious in those complaints, correcting the Bile when in a vitiated state, and carrying off all redundancies of that or any other obnoxious matter with which the stomach and Bowels are oppressed; producing the happiest effects in a safe and easy manner. These Pills possess the advantage of requiring neither confinement or restraint of diet during their use and will retain their virtues for a long period of time, their occasional use will be found to supercede the necessity of any other purgative.—Directions for use accompany every box of Pills:—To prevent disappointment, purchasers should be careful to observe that the genuine are sold only in wood boxes of an oblong form, on the cover of which is pasted an engraved label containing the words "Jean's Aperient Vegetable Pills, for Biliousness, Dispepsia, Headache, Nervousness, &c. sold wholesale or retail by the Inventor and Proprietor at Sydney, CB; and in Nova Scotia, at Morton's Medical, Warehouse, Halifax.
