FOR ALL THE PURPOSES OF A

FAMILY PHYSIC.

There has long existed a public demand for an effective purgative pill which could be relied on as sure and perfectly safe in its operation. This has been prepared to meet that demand, and an extensive trial of its wirtues has concluyively shown with what success it accomplishes the purpose designed. It is easy to make a physical pull, but not easy to make a physical pull, but not easy to make the best of all pulls—one which should have none of the objections, but all the advantages, of every other. This has been attempted here, and with what success we would respectfully submit to the public decision. It has been unfortunate for the patient hitherto that aimost every purgative medicine is acrimonious and irritating to the bowels. This is not. Many of them produce so mach griping pain and revulsion in the system as to more than counterbehance the good to be derived from them. These pulls produce no irritation or pain, unless it arise from a previously existing obstructions of the context of the pullic purply vegetable, no harm can arise from their use in any quantity; but it is better that any medicine should be taken judiciously. Minute directions for their use in the several diseases to which they are applicable are griven on the box. Among the complaints which have been speedily cured by them, we may mention Liver Complaint, in its various forms of Jaundice, Indigestion, Languor and Loss of Appetite, Listlessness, Irritability, Bilious Headache, Bilious Fever, Fever and Ague, Pain in the Side and Loins; for, in truth, all these are but the consequence of diseased action in the liver. As an aperient, they afford prompt and sure relief in Cosacious and Scurvy, Colds with soreness of the body, Ulcers and impurity of the blood in short, any and every case where a purgative is required.

They have also produced some singularly successful cures in Rheumatism, Gout, Dropsy, Gravel, Errysipelas, Palpitation of the Heart, Pains in the Back, Stomach, and Side. They should be feely taken in the spring of the year, to p

when taken to excess. The thousand case in which a physic is required cannot be enumerated here, but they suggest themselves to the reason of every body; and it is confidently believed this pill will answer a better purpose than any thing which has hitherto been available to mankind. When their virtues are once known, the public will no longer doubt what remedy to employ when in need of a catheric medicine.
