

## TAXES TOO LOW TO MEET NEEDS

### SOUTH SAANICH MAY INCREASE THE RATE

#### The Estimates Passed and Other Matters Dis- cussed.

(From Monday's Daily.)

It would appear more than probable that the tax rate of the South Saanich municipality will this year have to be increased over the rate levied last year. Finances for the year were discussed at the meeting of the council held on Saturday night when the estimates were passed. It was shown that the assessment was this year 10 per cent. higher than last, but most of the councillors showed that they considered it impossible to raise the required amount of revenue, \$22,827, on the last tax figure. Even at six and a half mill it was pointed out, allowing for a rebate of one-sixth for immediate payment as is the custom, the amount raised would scarcely cover the required sum.

No definite step was taken by the council in the way of fixing a rate, although the matter was looked into and discussed at some length. The return of the court of revision for the municipality held on Thursday last showed that only six complaints were considered, and that the assessment, after a few changes were ordered, stood at \$4,416,210, of which \$250,000 were improvements. The total is about half a million dollars over that of last year. At the opening of the discussion, a somewhat unexpected suggestion was advanced by Councillor Pointer to the effect that a tax should be levied on lands only, and not on improvements, which, he said, was being done in many parts of the world.

He very quickly admitted that he supported the principle, although he did not think the time favored its adoption. Councillor Nicholson opposed both Councillor Pointer's suggestion and the increasing of the tax. He said that it appeared unfair to raise both assessment and tax during the same year.

It was pointed out by the other councillors that a five-mill rate, the same as last year, would leave the municipality in arrears this year, but this did not convince Councillor Nicholson that a higher rate was necessary.

Councillor Pointer maintained that only lands be taxed during the present year, but found nobody to support him. The estimates were then gone into, and Councillor Pointer again made an unlooked for proposal, suggesting that the council's annual indemnity of \$100 each, or \$700 in all, should not be taken by the councillors this year, the money being turned into the general fund. This was voted down by the remainder of the members.

After some discussion it was decided by the council to forego the making of grants to agricultural associations and other bodies which are usually given some tangible support. It was generally concurred in that the finances of the municipality would not allow of the usual grants being made.

As finally put through the estimates are: Clerk's salary, 12 months, \$1,155; road superintendent salary, 12 months, \$1,160; constable salary, 12 months, \$1,160; school assistant salary, 12 months, \$1,160; school assistant salary, 12 months, \$1,160; printing and advertising, \$400; office expenses and supplies, \$600; police, \$150; interest loan by-law, \$195; donations, sundry relief, \$50; sanitary, \$200; electric, \$200; legal expense, \$250; councillors' indemnity, \$700; audit, \$25; incidentals, \$100.

Estimates for roads, work on some of which has already been done, were also considered, and the following list passed:

Ward 1—Richmond road, \$600; Cedar Hill crossroad, \$100; Blenheim road, \$100; Bay road, \$50; Republica road, \$200; spent during 1902, \$392; total, \$1,152.

Ward 2—Gorge road, \$100; Harriet road, \$100; Boleyn road, \$50; Cloverdale small roads, \$300; Tolmie avenue, \$50; Cook street, \$100; Cloverdale avenue, \$300; Tillamook road, \$100; spent during 1902, \$1,115; total, \$2,425.

Ward 3—Tyndal avenue, new road, \$300; Tyndal avenue, old road, \$150; Gordon Head road, \$200; Feltham road, \$200; Cadboro Bay road and side roads, \$200; Finnelly road, \$100; Cedar Hill road, \$100; Cedar Hill road, \$100; total, \$2,000; total, \$1,635.

Ward 4—Carey road, \$800; Glenford avenue, \$200; Wilkerson cross road, \$100; Holland avenue, \$200; Grass avenue, \$100; Prospect Lake road, \$50; Burnside road, \$150; Jones road, \$25; Wellington road, \$50; Daniels road, \$25; Gorge road, \$150; Gorge road, grading, \$25; spent during 1902, \$689; total, \$2,125.

Ward 5—Blenkinsop road, \$750; Cordova Bay road, \$100; Cedar Hill road, \$100; West cross road, \$100; road to Beaver Lake station, \$25; Durand road, \$75; spent during 1902, \$300; total, \$1,625.

Ward 6—Old west Saanich road, \$100; Butler cross road, \$200; Steffen cross road, \$200; Mt. Newton cross road, \$200; Mt. Newton cross road, \$200; Mt. Newton cross road, \$200; total, \$1,800.

In respect to the new law whereby the municipality is empowered to collect road tax from any male between 18 and 60, it was decided that the age limit would be raised to 60, the former age of 21 would be retained, and the lowest at which the tax was collectable. Councillor Dunn said that it was unconstitutional to tax males under 21, as they had no vote, and taxation without representation was contrary to the British constitution.

Letters were received from J. C. Newbury and Alan S. Tumbull protesting against the assessments on their property on the ground that the figures were too high, but, as the court of revision has already accomplished its work, the writers were informed that the matter was now out of the council's hands.

A number of other matters of minor importance were also dealt with, after which the council adjourned.

## WEDDED AT ASHCROFT.

Ashcroft, June 27.—A quiet but pretty wedding took place on Wednesday, June 24th, at the residence of the bride's father when Rev. Ewing G. Thompson and Pauline D. Tingley, younger daughter of Mr. S. Tingley, were united in the bonds of holy matrimony, in the presence of the immediate relatives of the bride.

The ceremony was performed by Rev. Jas. G. Reid, of Vancouver. The bride was prettily attired in white tulle, and was attended by her sister. The groom was supported by a college class mate, Rev. R. Wallace Collins, of Victoria.

After the wedding supper was served a reception, which was largely attended by friends of the contracting parties was held from 8 to 10 p. m.

Mr. and Mrs. Thompson are spending their honeymoon at the coast.

The esteem in which the young couple are held was testified by the numerous costly gifts received.

## FIGHT FOR DEAD MAN'S LAND.

Vancouver, June 27.—Owing to trouble over surveying a pre-emption in the Pemberton Meadows district, Provincial Constable Smith will take a journey that destination, it is pointed out, appears to have originated in the death of E. Milton, whose frozen body was found in his shack on his pre-emption last year. This season John Elliott and F. Hutchinson took possession of the place as an abandoned pre-emption, but Albert Hilton, the brother of the deceased, alleged that he had a prior claim having sent in his letter of application before they did.

The question of ownership was directed to survey and stake out the land, and with Mr. Burnett, a surveyor, proceeded to do so. Elliott and Hutchinson, however, refused to allow them to proceed with the work, and knocked down the surveying instruments. Constable Smith goes north with Mr. Milton to compel the squatters to allow the completion of the survey. The question of ownership may then be fought out in the courts.

## ADVANTAGES OF THE SALT WATER SYSTEM

### Mayor Hall Points Out Wherein Efficiency Will Be.

(From Monday's Daily.)

That the installation of a salt water high pressure is very much more preferable than attempting to improve the city's fire-fighting appliances to a point of efficiency that will enable them to give the same degree of protection that will be secured by the former means, is the opinion of Mayor Hall. Any saving in the original cost that might be effected through improving the present system would be much more than made up by the difference there would be in the cost of maintenance. While the salt water system would cost little or nothing for maintenance the adoption of the other proposal would necessitate a large increase in the number of men on the fire brigades and in the use of horses besides repairs to engines, etc.

Discussing the matter to-day Mayor Hall said that it would require three of McRoryweather & Co's best engines to give the protection that the proposed salt water system would. These would cost \$5,000 each in London, to which must be added cost of transportation, fuel, etc. It would then cost at least \$600 each for teams, horses, and harness, which would mean \$2,400 more. The expenditure would not stop there, however, for it would be necessary to build a new hall for these engines, bringing the total cost up to at least \$60,000.

When these engines were installed they would require three, if not four, men each to look after them, which would mean at the very least an expenditure of \$225 per month for each engine. The men required for these engines would be two engineers and one if not two drivers, besides which the cost of new harness would add to the payroll in other ways.

He said that the proposed salt water system would be fed from time to time new ones would have to be bought for they did not last long. What addition of three engines of the capacity of the proposed salt water pumps would thus prove an annual drain on the city, the high pressure system would not cost a cent for maintenance once it was installed. There was also another advantage. With the high pressure system it would require less than half a minute to secure pressure from it, while the engines would have to be hauled to the scene of the fire and would take from five to eight minutes to get up steam. Of course, they could be getting up steam on the way to the fire, but if they arrived at the destination before the steam was up the firemen would have to wait until the engine was ready. In the meantime with the salt water system they could be engaged fighting the fire. In the case of the salt water system, it must be remembered also that there were two pumps both of which could be used in case of emergency. To provide equal safety with the fire engines it would be necessary to purchase six.

With the high pressure system also at present would be required in the case of an engine driven engine, to be released from that work during fire and could help in handling the hose.

In connection with the necessity for additional protection, his worship said that while the insurance men might be holding up the city in this matter, there was no other way to get lower rates than by meeting their demands. It might be quite true that Victoria would be released from that work during fire and could help in handling the hose.

## RECALLED THE EARLY DAYS

### RECEPTION HELD AT ST. ANN'S ACADEMY

#### The Sisters in Charge Are Con- gratulated on Their Work.

(From Monday's Daily.)

The old days of St. Ann's convent and academy were recalled here again on Saturday night at the closing events of the golden jubilee celebrations, by the several speakers who attended the function of the memorable event. H. Dallas Helffick, K. C. D. W. Higgins, Frank Sehl and Judge Harrison all returned to the days of the beginning of the convent's work, and spoke in praise of the present, of events which had transpired before their birth.

The principal feature of Saturday's reception was the presentation of a purse of gold amounting to some \$250 to the very respected and revered mother superiors. The gift was from the people of Victoria who sent the offering as a token of love and esteem and in acknowledgment of the splendid work done by the academy under the able direction of the recipient.

H. Dallas Helffick in making this presentation acknowledged the pleasure the occasion was to him, and spoke feelingly of the work done by the sisters through the fifty years the convent has been established. He also referred to the vision of the future, and paid a tribute to the work of Sisters Providence and Winnifred in St. Joseph's hospital as well as that of Bishop Demers and Archbishop Seghers. He spoke in praise of the work done during the past fifty years by the sisters and of the manner in which that work had been carried out without murmur or complaint through the long and cheerfulness.

He expressed the hope that the reverend sister would long live to continue her splendid work.

Frank Sehl, in responding on behalf of the mother superiors, spoke briefly of the past and told how his wife had received an excellent education at the academy. He said that his daughters were at the present time receiving the same excellent instruction. Concluding he said words filled him in speaking of the past. There were also some appeals to be disposed of.

After a lengthy argument by counsel, Mr. Justice Martin to-day reserved judgment in the Admiralty case of the American schooner Cutting, seized by the Kootenay in the Strait of Juan de Fuca, and the best three scores out of five count in the totals at the finish. The Winsby medal, 15 singles, gun under elbow, unknown trap and angle, possible 15. Scores: Leavell, Becktel and Dadds, 18 each. The competitors are required to shoot five times at 25 yards, and the best three scores out of five count in the totals at the finish. The Winsby medal, 15 singles, gun under elbow, unknown trap and angle, possible 15. Scores: Leavell, Becktel and Dadds, 18 each. The competitors are required to shoot five times at 25 yards, and the best three scores out of five count in the totals at the finish. The Winsby medal, 15 singles, gun under elbow, unknown trap and angle, possible 15. Scores: Leavell, Becktel and Dadds, 18 each. The competitors are required to shoot five times at 25 yards, and the best three scores out of five count in the totals at the finish. The Winsby medal, 15 singles, gun under elbow, unknown trap and angle, possible 15. Scores: Leavell, Becktel and Dadds, 18 each. The competitors are required to shoot five times at 25 yards, and the best three scores out of five count in the totals at the finish. The Winsby medal, 15 singles, gun under elbow, unknown trap and angle, possible 15. Scores: Leavell, Becktel and Dadds, 18 each. The competitors are required to shoot five times at 25 yards, and the best three scores out of five count in the totals at the finish. The Winsby medal, 15 singles, gun under elbow, unknown trap and angle, possible 15. Scores: Leavell, Becktel and Dadds, 18 each.
