PROFITS IN PAPER MAKING

No industry not even mining tself has yielded as large and permanent dividends as the manufacture of Wood Pulp and Paper. At the present time it is absolutely impossible to buy stock in the majority of the operating pulp and paper mills of Canada, and there is not the remotest doubt but that the stock which we are now offering for subscription will not only pay from 15 to 25 annual dividends, but will be selling at a big

premium within 90 days from the opening of the plant. The official United States government report issued at Washington, D. C. January 15, 1909, showed that the nine paper mills of the state of Maine, after deducting insurance, depreciation, rent, wages, administracost of material, etc., made a net profit in 1908 of \$705,718. The 43 mills of the State of Massachusetts manufacturers exclusively of newspaper, after deducting expenses of every kind and character, made a profit of \$7,957,494. The 36 mills of the State of Michigan made a net profit of \$3,052,392. The 40 mills of the State of Pennsylvania, manufacturers of news, book and fiber paper, showed a net profit of \$3,426,740. The 75 mills of New York, manufacturers exclusively of book and newspaper showed a profit of \$5,259,985. Twenty mills of the State of Ohio represented a profit of \$758,856, while the 32 mills of Wisconsin, confined exclusively to news and wrapping paper, showed a profit of \$2,326,684. The St. Argis Pulp and Paper Co., showed a gross profit in 1908 of \$229,974.27 in 44 months. The Rumford Falls Pulp and Paper Co. made \$488,000 on a capital of \$500,000. The profits of the Luarentide Pulp and Paper Co., of Grandmere, Quebec, in 1908 represented \$251,458. In 1907 the net profits after deducting all interest charges on bonds and loans, etc., amounted to \$283,321. The Kellner-Parlington Pulp and Paper Co. last year showed a gross profit of \$1,252,205. The official United States government report under date of July 25, 1907. Bulletin 80 showed that the paper mills of the state of Oregon made a gross profit of 20 2-3 on the value of goods over all expenses, while the mills in California showed the value of goods over all expenses of 19 per cent. The gress profits of the International Paper Co. for 1908 amounted to \$1,635,918.

Who would not be glad now to buy a few thousand shares of stock in the Eastern Canadian Paper Mills, for instance, at the price they were originally quoted at, such as the Toronto Paper Co., Dominion Pulp and Paper Co., Lincoln Paper Co., Montreal Paper Co., Lawrentide Pulp and Paper Co., Trent River Pulp and Paper Co., Georgetown Paper Co.,

majority of operating pulp and paper mills. People ordinarily buy this character of stock as a permanent investment and in consequence it is usually retired from the market. The last issue of the British Paper Maker Journal gave the following quotations: Darwen Paper Co., is shares are now at £9%; East Lancashire Paper Co., £10 shares are new at £15% and £16%; the £5 shares of the Guardbridge Paper Co. are now at £91/2; Rambottam Paper Co. £5 shares with only £3 paid, are now at £614; Roach Bridge Co. £5 shares with only £41/2 paid, are now at £6. The offering the Preferred Stock of The Western Canada Wood Pulp and Paper Co., Ltd., for subscription we do so with a feeling that it is the best industrial stock ever offered in Western Canada. The Company have acquired 55,669 acres of magnificent Pulp Limits at Quatsino Sound, Vancouver Island, large water power on Marble Creek, Quatsino Sound. and are proceeding with the erection of the Pulp and Paper Plant, which when fully complete will have a capacity of 600 tons of news and wrapping paper per week. The erection of the plant is under the supervision of Mr. Charles B. Pride, of Appleton, Wis., one of the most distinguished authorities in the United States or Canada on the erection of Pulp and Paper Mills, having built more than fifty of the leading mills of the country during the past twenty years. We are rushing the work along and are confident that we will have the pulp division, with a capacity of 100 tons of pulp, in operation by December 1st this year. The Preferred Stock which we are now offering is entitled to a cumulative preferential dividend of 7 per cent., payable before any dividend is paid on the Ordinary Stock. After 7 per cent., has been paid upon the Orary and Preferred stock, both stocks thereafter participate equally in all surplus profits which the company may determine to distribute for that year. As a matter of fact there is no reason why we should not pay con-servatively from 20 to 40 per cent. on the Preference Stock, and within 90 days from the opening of the Pulp Plant the Stock will be seiling at a big premium. We know the big dividends that the paper mills of the United States and Canada are paying and with our vast timber limits, huge water powers, and proximity to the great Oriental markets, there is no reason why we should not pay at least 10 per cent. better dividends than the Eastern Canada or American mills.

Northern Mills, St. Raymond Paper Co., Kinleith Paper Co., and other

Eastern mills. As a matter of fact it is impossible to secure stock in the
