

WISCONSIN WALKUP—U of W's Elm Drive Halls, located just over one mile west of Chadbourne Hall. The photographer was looking east. Most of the large campus is along the lakefront.

Rising Residences

From Page One

"Chadbourne Hall has been found most satisfactory . . . by the people who built it, those who live in it, and those who look after it", Prof. Ryan stated. "It is quite coincidental that they happened to design and build residences so similar to those we have been considering here at U of A."

LOOKING UP

It is highly likely that Y-shaped residences will be built at the University of Alberta, according to B. W. Brooker, University superintendent of buildings.

Nine-storey buildings, with about 36 rooms on each floor, are being considered. The dining facilities would be in a separate building, attached to residence hall.

Rectangular residences of similar

height are also being considered at U of A. Current plans call for the completion of the first housing unit by the fall of 1962.

DECISION PENDING

A final decision on the actual type of building is expected at the next meeting of the Board of Governors, April 7, according to Dr. W. H. Johns, University president.

Several four floor walk-up residences are in use on the 24,000 student Wisconsin campus, many of them constructed quite recently. U of W officials find them quite adequate, but are much more enthusiastic about Chadbourne, Mr. Ryan said.

The Y-shaped plans afford a more economical use of floor space because the rooms are closer together and less corridor area is required.

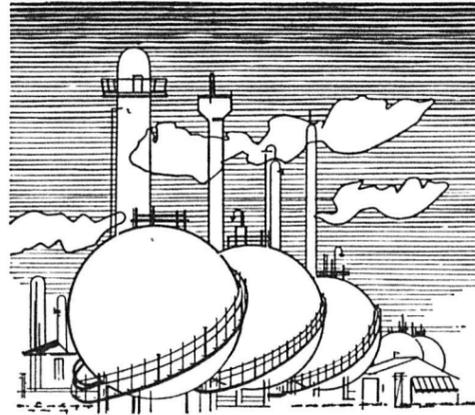

Carleton University has no land problem at present, and is erecting buildings no more than three to five stories high. A library similar to that proposed for UAC has been completed.

The five Albertans were quite impressed with the University of Michigan's new undergraduate library, Mr. Ryan reported.

The open-shelf library has both educational and economic advantages, he said. Floor space is employed more profitably, and book circulation has been found to be much greater than at conventional libraries of similar size.

Careers

WITH
**CANADIAN CHEMICAL
COMPANY, LIMITED**

This advertisement will be of most interest to graduates in chemistry, chemical, mechanical and electrical engineering and engineering physics.

What interests you most about a career? *Opportunity* should. Opportunity not only for advancement, but opportunity for professional growth through varied and interesting experience. We firmly believe in diversified experience and, luckily, we can offer it in our fully integrated operation. We find it's best for you (makes life more interesting and provides greater opportunity) and best for us (we end up with senior people who are fully experienced in our business). Now, let's have a crack at answering some of your questions.

What do we do? Canadian Chemical Company produces basic organic chemicals, cellulose acetate flake and acetate yarns, fibres and staple.

Where do we do it? At Edmonton. We have three plants on a 430 acre site. The first produces chemicals—alcohol, ester and ketone solvents, acetic acid, glycols, pentaerythritol, formaldehyde and other organics. The second produces cellulose acetate flake. The third, acetate and Arnel yarns and fibres.

Sales offices are located in Montreal, Toronto and Vancouver.

What is our future? Very bright. (It just happens to be true.) We think of ourselves as a young, progressive, fast-growing Canadian firm with world-wide affiliations. The record bears this out. So does the operation of our Edmonton plant. And the fact that our engineering department is one of the largest and most diversified in Canada.

Our raw materials are basic Canadian natural resources: petroleum by-products from Alberta and cellulose from the forests of British Columbia. Our markets are world-wide, and through our affiliates we have a strong alliance with companies in the textile, chemical and plastics industries:

What would you do? As a qualified chemist or engineer you could be working on *product development, research, process engineering, plant design, construction* or some aspect of production. This is exciting work in many completely new fields. As a chemist or chemical engineer you could choose also a career in *sales* or *technical service*.

What else should you know about us? Lots more. You can get more information and literature by writing to Department "A" at 1600 Dorchester Blvd. West, Montreal 25, Quebec. Or to the Personnel Department, Canadian Chemical Company, Limited, P.O. Box 99, Edmonton, Alberta.

the Co-ordinating Council which coordinates Progressive Conservative activity in Edmonton.

During the 1957-58 term he founded and was president of the Mixed Bowling Club. During his years on campus he has participated in intramural sports such as hockey, golf, curling, cross country.

NFCUS SEMINAR

Last summer Mr. Jenkins was a delegate to the NFCUS seminar held in Vancouver. He is a member of Phi Kappa Pi fraternity.

Mr. Church's average in agriculture last term was 86 per cent. He is a graduate of Crescent he played for the school football team for three years. In High School in Calgary, where 1956-57 he was high scorer and most valuable player in Southern Alberta Intermediate Football League.

In his first year at University 1958-59, he was first year representative on the Agriculture Club executive. The next term he was intramural representative for agriculture. He has been captain of the Ag hockey team for the past three years.

BAR NONE HEAD

Mr. Church worked on Jubilee Day last term, has been co-director of Bar None for the past two years is social convener of the Ag Club this term, was the Ag representative on the Winter Carnival this term and has worked on VGW.

He has participated in the WUS fund drive for the past three years. Mr. Church won a national 4-H award in 1956, and was awarded a trip to Toronto.

During the last two summers Mr. Church has worked for the 4-H branch of the Alberta Department of Agriculture, judging livestock shows all over Alberta.

COUNCIL REP

This term he is agriculture representative on Students' Council; member of the residence committee; a member of the investigation committee; a member of the 4-H Alumni Club executive; and director of the Olds School of Agriculture Alumni Association.

Both Mr. Jenkins and Mr. Church are married.
