

- Edison, Thomas, railway telegraphy, 131.
 - electromotograph, 175.
- Electric currents, Ch. VI, 49
 - not currents but atomic motion, 54.
 - induction of, 56.
 - guarded against, 169.
 - at Niagara, 193.
- Electric generators, Ch. VII, 62
 - frictional, 49.
 - galvanic batteries, 62.
 - storage-batteries, 64.
 - dynamos, 67, 192.
 - metal heating, 74.
- Electricity, science of, 6.
 - achievements of, 16.
 - eras in science of, 18.
 - theory of, Ch. V, 39.
 - not a fluid, a form of energy, 40.
 - static and dynamic, 46.
 - measurement of, Ch. IX, 83.
- Electric light, cause of, 50.
- Electric machines, 49.
 - frictional, 51.
 - galvanic or chemical, 51.
 - mechanical, 70.
- Electromagnet invented by Faraday, 14.
 - commercial value, 23.
 - theory of (soft iron), 26.
 - permanent (steel), 28.
 - condition of use, 30.
 - the earth a, 32.
 - germ of, 93.
 - differential, 115.
- Electromotograph, 175.
- Ellsworth, Miss, sends first telegraphic message, 96.
- Ether, lines of force, 31.
 - nature of, 40.
