

## Stock Exchange Notes

Montreal, November 10, 1910.

The East Canada Power and Pulp Company Bonds and Common Stock, \$1,500,000 each, have been listed and were called on the Exchange for the first time this week. The Cement Stocks have been prominent in the trading and the Common was the leader in point of activity at a higher level. Quebec Railway kept in the forefront and was heavily traded in, at a new high level for the movement. The stock is said to have been largely absorbed by Paris buying. Shawinigan Power forged to the front and a large number of shares changed hands. Dominion Steel Corporation after being a heavy feature improved in price on sales of some 4,000 shares. Canadian Pacific and "Soo" Common both fell off in price and only a moderate business was done in these issues. The traction stocks, apart from Quebec Railway, were inactive and Montreal Street sold at a lower level, showing a sharp reaction from the prices prevailing prior to the turnover of control in the directorate to the Canadian Power interests. Crown Reserve was only featured to the extent of 4,950 shares at about last week's figures.

The Bank of England rate remains unchanged at five per cent.
