There is a Vast Difference Between Keeping HOLSTEINS

and just keeping cows. ONE GOOD HOLSTEIN COW WILL DO THE WORK OF TWO OR THREE ORDINARY COWS. You save in feed, housing, risk and labor. Holstein cows milk longer, more per year, and more per life than any other breed. There's money for you in Holsteins.

W. A. GLEMONS,
Sec'y H. F. Association, St. George, Ontario

CLOVER BAR

Sires from R.O.P. and R.O.M. Dams We have several choice ones, 2 to 10 months old, from the splendid sire Count Mercedes Ormsby (sired by Paladin Ormsby) all are out of R.O.M. and R.O.P. dams with records as 3-year-olds, 21.6 butter; 2-year-olds, 16.3 butter; mature cows 14.691 lbs. milk with 661 lbs. butter. A couple of these sires fit for service, they are nice fellows, priced reasonable. Write or come and see them.

P. Smith, R. R. No. 3, Stratford, Ontario

Holstein Bulls

Twelve months and under from R.O.P. and R.O.M. cows and by such sires as "King Segis Pontiac Duplicate" and "King Favour Segis Clothilde." Settings of Indian Runner Ducks \$1.50 per setting.

R. M. HOLTBY

R.R. No. 4, Port Perry, Ontario

FOR SALE Fine bred Holstein Bull for service. Born January 29, 1914. Sire King Lyons Hengerveld, No. 8903, one of the strongest bred young sires in Canada. The records of his dam and granddam average 32.19 pounds of butter in seven days and that of his four nearest dams 31.90. Dams Calantha Mercedes Teles, a richly bred Record of Merit heifer of great promise. The bull is well grown, a good individual, color markings about equal. Fit to head any herd. Address: G. F. Mahon, Woodstock, Ontario

Holsteins—This time I offer a beautiful bull rising 3 years of age, whose dam as a 3-year-old produced 23 lbs. butter in 7 days and whose sire is a son of Francey 3rd—butter 29.16. This bull's dam is rising five years of age and gives great promise for a 30-lb. record with next calf, which will be in June, 1915. Her two records, 1st as a 2-year-old 17.19 and as a 3-year-old 23.32 stamp her as a sure 30-lb. cow. Have two great yearlings at \$100 each.

James A. Caskey, Madoc, Ontario

The Maples Holstein Herd offers ready for service sons of Prince Aggie Mechthilde from R.O.P. and R.O.M. sisters and dam of Duchess Wayne County 2nd, Canadian Champion two-year-old for butter in R.O.P. 1674 lbs. milk, 846 lbs. butter. Write: Walburn Rivers, R.R. No. 5, Ingersoll, Ont.

Holsteins, Yorkshires and Dorsetwolds R. Honey & Sons, R.R. No. 1, Dorford, Ont. formerly Brickley, offers a young bull whose four-year-old dam and 3-year-old dam average milk one day 80 lbs., 20.00 and 21.43 lbs., 365 days 1704 lbs. Also females of various and other bulls of similar breeding. Write: R. Honey & Sons, Dorford, Ont.

HOLSTEIN BULL to be sold. Grand individual, nicely marked, heavily bred. Dam imported show row white, record of over 17,000 lbs. of milk. Sire with certificate. Glenora Stock Farm, Redway, Ont.

Questions and Answers. Miscellaneous.

Sowing Clover.

Would you please tell me what you consider the best method of sowing clover or timothy seed with a disc drill. I have been accustomed to sow before the drill, but thought that perhaps the disc turned too much of the surface soil on the seed, as the greater part of the soil seems to be turned into the track of the next disc. This causes the seed to be very slow in germinating.

CONSTANT READER.

Ans.—Sow in front of the drill. Do not put too much pressure on the drill.

Milking Cow Feeding Pigs.

1. Should a cow or heifer that has freshened be milked dry the first few milkings?

2. What should a sow be fed to keep the little pigs from getting too fat? We have some little pigs, extra fat, and they breathe as if they were choking.

3. How should growing pigs be fed to keep them from getting too fat?

H. J.

Ans.—1. Many claim not. It is generally advisable to stick as close to nature as possible, and the young calf if allowed to suck certain does not take it all for a time.

2. Feed lightly on ground oats or shorts and a little skim-milk, and give plenty of exercise. Cut down the feed and let the pigs out in a yard.

3. Avoid too fattening feeds, as corn, wheat, peas, etc. Feed on shorts, oats, roots or grass and skim-milk.

Feeding Value of Potatoes—Cottonseed Meal for Cows.

1. What feeding value is there in 100 pounds of potatoes for hogs? Are they good to feed to cattle and horses?

2. It is said that cottonseed meal will cause cows to abort. Is there anything in the statement?

A. R.

Ans.—1. By experiment it has been found that from 1½ to 5 pounds of potatoes are equal to 1 pound of corn meal. They should be cooked for hogs and mixed with meal. In this way they have a value and will replace considerable meal. For cattle and sheep they should be sliced and fed. They also have a considerable feeding value for such stock. For horses they are only fair, but baked potatoes will help to fatten a horse considerably.

2. Nothing, when the meal is fed judiciously. Abnormal quantities of any kind of feed will sometimes cause trouble.

3. No.

Share Farming—Hired Help.

I am renting a farm on shares and furnish stock, implements, seed-grain, and feed to last till May 15, pay the taxes, and the term expires March 1, 1916. The tenant does all work, furnishes all help for farm, road work, and threshing, and gets one-third of everything but the hoed crop, of which he gets half. Who should pay for blacksmith's bills, threshing machine, and any feed bought, such as bran, shorts, pig feed, anything needed and not grown on the farm, and when should the products be divided, and who should pay for feed supplied till May next?

A. B.

Ans.—1. This is a matter to be decided upon by the parties concerned. It might be divided as are the products, or the owner of the farm might pay all.

2. The Scottish Farmer of Glasgow, Scotland, on the 13th inst. when, at present, respects would be quite needless, owing to the war, there is a great shortage of men in the old field.

More Profits For Farmers!

This is the result when you build an Adirondack "Sturdy Stave" Silo. Every farmer these days fully realizes that ensilage for Cattle Feeding is the one and only way to economy. You therefore cannot make a mistake when installing—

STURDY STAVE ADIRONDACK SILOS

They cost less money and with hundreds of satisfied owners the Adirondack has proved its superiority over others. No such thing as spoiled ensilage. Its walls are air, moisture and frost-proof. The Adirondack will stand all weather conditions, is made 100% more durable and protected from decay by our special preservative process which every Stave and part is subjected to before leaving our factory.

This is an exclusive feature of Adirondack Silos and does not cost you one cent more.

Adirondack Silos are backed up by our organization of over 50 years experience and sold with our unlimited guarantee which positively insures satisfaction.

"Made in Canada of Canadian material by Canadian workmen for Canadian Farmers."

Write for our Big Catalogue FREE which fully illustrates and describes Adirondack Silos.
