

Synopsis of Canadian North-West Land Regulations

THE sole head of a family, or any male over 18 years old, may homestead a quarter-section of available Dominion land in Manitoba, Saskatchewan or Alberta. Applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the District. Entry by proxy may be made at any Dominion Lands Agency (but not Sub-Agency), on certain conditions.

Duties—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres, on certain conditions. A habitable house is required except where residence is performed in the vicinity.

In certain districts a homesteader in good standing may pre-empt a quarter-section alongside his homestead. Price \$3.00 per acre.

Duties—Six months residence in each of three years after earning homestead patent; also 50 acres extra cultivation. Pre-emption patent may be obtained as soon as homestead patent, on certain conditions.

A settler who has exhausted his homestead right may take a purchased homestead in certain districts. Price \$3.00 per acre. Duties—Must reside six months in each of three years, cultivate 80 acres and erect a house worth \$300.

The area of cultivation is subject to reduction in case of rough, scrubby or stony land. Live stock may be substituted for cultivation under certain conditions.

W. W. CORY, C.M.G.,
Deputy of the Minister of the Interior.

The Help Problem

In the farm is solved by the telephone. It enables the farmer to obtain help when it is needed, a very important necessity these days.

We have a very interesting bulletin "A Telephone on the Farm." It explains how every farming community can build and own its independent telephone system cheaply. It tells you how to get market and weather reports, the latest news, etc.

It will be sent free if you write for Bulletin No. 1011.

This great offer is made to introduce the famous Fleet Pen to Canada. Over 100,000 have been sold in England.

Agents Wanted. Liberal Terms.

John Deere Implements

The Spreader with the Beater on the Axle The John Deere Spreader

The beater—the business part of a spreader—and all its driving parts are mounted on the rear axle. That is why the John Deere is the simplest, easiest running, most efficient spreader. Here is what the beater on the axle means to you:

- 1st.—No clutches to give trouble.
- 2nd.—No chains to break or get out of line.
- 3rd.—Less than half the parts heretofore used on the simplest spreader—some two hundred parts are done away with.

The Beater on the Axle

4th.—Manure is not thrown on the axle—straw and trash cannot wind around it.

5th.—You get big drive wheels and a low down spreader, without stub axles—that means traction and strength.

6th.—Drive wheels back out of the way when loading—you see where you place each forkful.

7th.—Only hip high—easy to load.

8th.—Easy to operate—To start spreading, you pull back the lever at the driver's right—that's all. A boy can operate it.

Power to drive the beater is taken from the rear axle through simple gears like those used on horse powers. All the working parts are within the beater and mounted on the rear axle. They cannot get out of order.

Get These Books—They Are Free
Every farmer who asks us about the John Deere Spreader will receive, in addition to a complete description of the John Deere Spreader, a valuable text book, "Farm Manures and Fertilizers," free. This book tells all about manure, how to apply it and how to double the value of each load of manure by a proper system of top dressing.

John Deere One-Way Plow The Power Lift Plow with the Auto Foot Frame Shift

Auto Foot Frame Shift insures uniform plowing on hillsides or level land and in irregular fields. Full width furrow obtained under all such conditions. Team is relieved of all side strain.

The Auto Foot Shift is easy to operate. Foot levers are directly in front of operator, within easy reach. Slight foot pressure swings frame and moves plow as desired.

A Real Power Lift. Power lift is easy to operate and reliable. A slight pressure upon foot lever causes a lug to engage in ratchet in the hub, and forward movement of horses raises the bottom.

All Steel Frame

This makes the plow strong and durable, light draft and neat in appearance—features not found in cast iron frames ordinarily used. Clevis attached to beam point—no pulling strain upon frame and power is applied directly to load.

Easily Handled—Light Draft

Long and well balanced frame—adapts plow for use by either man or boy. High lift—plow easily transported over rough roads. Long range shift for plow bottoms provided. Easily backed and turned.

Long Malleable Beam Clamp and Bracket

Beam securely bolted to long malleable clamp. Adjustment of beam is positive. No collar, set screws or other similar devices to work loose and allow beam to get out of alignment.

Wide Tread

Plow does not tip over on hillsides. Wide bearing base also permits use of wide or narrow cutting bottoms.

There are other superior features of this plow that will impress you when you see it in operation. We will send you any further description free, if you will write us.

Don't Pay Your Hired Man Extra Wages

Poor tools cut down his efficiency. Use good judgment by buying from a man who has an established reputation for high quality implements—your nearest John Deere dealer.
