Ditcher Makes the Farm Produce Better

Better crops from better soil conditions are the result obtained by the man who farms the Martin way. Correct drainage and proper grading mean earlier cultivation, fuller germination and the elimination of loss from rot.

Keep your soil right and make your farm produce more by using a Martin Ditcher. It will ditch and grade in half the time required by the old fashioned methods and return its cost many-fold in one season.

The Martin Ditcher and Grader is the handiest of all farm implements. It is wheel-less, cogless and leverless—strong and simple as a plough.

Ask our nearest office about the Martin Ditcher and Grader for your farm.
