## GREEN BACKS in STRAW STACKS

THE wastage of grain by the average Threshing Machine is far more than many suppose. The Operator usually knows it, but he can't help it with that kind of machine, so he covers it up all he can and lets it go at that. The Farmer suspects it, but thinks he has to put up with it, and much of his hard-earned money goes over into the straw stack.

This great wastage is the result of employing an incompetent type of Threshing Machine that rushes the straw to the stack, but does not beat the grain out of it.

It is up to you Farmers to say what Machine will thresh your grain this season. You have worked hard to grow the grain and you pay the bill for threshing it. You can't afford to divide your profits with the straw pile, for every bushel that goes into the stack is money right out of your pocket.

**You can save your Thresh Bill by Hiring a Red River Special to do your Threshing**

It will save the grain for you; it will waste less of your time; it will do your job quicker; it will clean your grain better; it will pay you all around. It is the only Threshing Machine made that uses the true and sure method of separation by beating the grain out of the straw just as you would do with a pitchfork.

The Big Cylinder, the Man Behind the Gun, and the Shakers that toss the straw up and beat it as you would do with a pitchfork save the grain that others waste, whether it be wheat, oats, rye, barley, flax, peas, rice, alfalfa, timothy or other grains or seeds.

THE RED RIVER SPECIAL WORKS ON AN ENTIRELY DIFFERENT PRINCIPLE OF SEPARATION from any other make. It beats it out while other makes hurry the straw to the stack and expect the grain to fall out, which it does not do.

Have your threshing done this year by a RED RIVER Special. IT WILL SAVE YOUR THRESH BILL.
