

Cameron Pumps

Down in the mine where there is a steadily increasing volume of water to pump out—reliability counts, and it is under these conditions that "Cameron" Pumps have proved their superiority even more than in other situations.

"Camerons" are essentially long service pumps, designed in every detail for efficiency and dependability. If you are looking for this kind of a pump it will pay you to investigate the "Cameron." Ask our nearest branch for bulletins.

This illustration shows a "Cameron" No. 6 "MT" Centrifugal pumping 600 gallons a minute against a 1250 ft. head in a large western mine, and doing it efficiently and at low upkeep cost.
