New Yorkers are beginning to doubt the proposition that "what goes up must come down," when they consider the prices of food and study the quota-tions of the retail market for the last

Synopsis of Canadian North-west Land Regulations.

A NY person who is the sole head of a family, or any male over 18 years old, may homesteed a quarter-section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or sub-Agency of the district. Entry by proxy may be made at any agency ollocrain conditions, by father, mother, son, daughter, brother or sister of intending homesteader. Duttee-Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 30 acressolely owned and occupied by him or by his father, mother, son, daughter, brother or satisfactors.

SHOT HIMSELF.

Crazy Sailor From Elkhart Had Pistel and Chloroform.

Attacked Woman in Buffale and Then Killed Himself.

Buffalo, Dec. 11.—From a bullet wound in his head, Leonard W. Bushart, of No. 427 Main street, Elkhart, Ind., died yesterday afternoon in a room in the rear of the store of Louis Sofia, No. 59 Dante Place, formerly Canal street. The police were satisfied last night that it was a case of

Bushart, who was not over 22 years old, was a sailor on the steamer W. A. Paine, which came into port on Thursday. Yesterday morning he expressed some clothing to his home in Elkhart by the American Express, and it was from the receipt found on him that his name and address were procured. were procured.

At 10 o'clock in the morning he wer

were procured.

At 10 o'clock in the morning he went to the tailor shop of Kropman & Greenberg, No. 15 North Division street, and was measured for a suit of clothes and paid \$15 down. About 1.20 o'clock yesterday afternoon he entered the store at No. 59 Dante Place. Mrs. Sofia was alone in the place at the time.

She told the police that he rushed into the place excitedly, handed her a \$5 bill and entered the rear room. She supposed that he was being pursued. She looked into the street and everything was normal. She then went to the room to see what Bushart was doing, and she claims that he grabbed her and tried to place a handkerchief saturated with chloroform across her face. She was stronger than he and broke away and a moment later heard the shot.

Mrs. Sofia raised an outery and the

moment later heard the shot.

Mrs. Sofia raised an outery and the police were called. Bushart was partly dressed and dead from a bullet in the right temple, when found. The police learned that the pistol with which he was killed was his own. He had displayed it in the tailor shop. The handkerchief and a bottle of chloroform were in the room. It was later learned that he lad bought the chloroform at Sloan's drug store, Main and Seneca streets. He said he wanted the chloroform to clean his clothes. His body was sent to the morgue.

ROQUEFORT CHEESE.

Methods of Transforming Sheep's Mill

Into an Export Product.

The care necessary to secure a good product is astonishing to those who have never been to Roquefort to visit the various factories. This industry consumes annually about 92,450 gallons of sheep's milk, from which is produced about 3,797 metric tons of cheese (metric ton, 2,204.6 pounds). This amount of milk is handled in some 360 dairies in the Aveyron and adjoining departments and the herds of sheep from which the supply is obtained are estimated at 600,000.

The milk must be pure unskimmed Into an Export Product.

milk to make 15 kilos of imitation Roquefort cheese. These imitations comprise the Forme de Cantal, Bleu d'Auvergne, Bleu de Gex, etc. Roquefort cheese has a more delicate taste and rich butter color, while the imitations rich butter color, while the imitations have a bitter taste, soon become a deep yellow after cutting, and when exposed to heat turn nearly black. Roquefort cheese can be exported to torrid countries, while it is said that cheese manufactured partly with cow's milk could not withstand the transportation and the temperature.

The dairies are in dry and airy spots, and the whitewashed walls, cemented \$104,518.

and the whitewashed walls, cemented floors and screened windows all conduce to cleanliness. The dairy consists of three rooms, in the second of which s to cleanliness. The dairy consists of three rooms, in the second of which a temperature of 63 degrees F. is recorded by the thermometer the year round. The milk is first heated to a temperature of 90 degrees F. and curdled by the addition of rennet. The curds pass through various processes of draining, salting, moulding, etc., but to state this generally gives only a slight idea of the time and care necessary. From start to shipment it requires fifty to sixty days to turn out a satisfactory product. The various operations might be briefly stated as follows: (1) Treatment of the milk—skimming, heating, curdling, dividing the curds, draining, putting into moulds and scattering with powder of stale bread crumbs, tasting, hardening; (2) treatment of cheese at factory—receiving and weighing, first and second salting, brushing, piercing and classifying, placing in caves, first turning, maturing in caves, second turning, second classifying, maturing continued, third and last turning before expedition.

and last turning before expedition.

The preparation of the bread is a long and interesting part of the process. A special kind of bread is moistened and left to mould in a cave for about two months. It is then cut into small pieces, dried, ground and boiled. The powder thus obtained is scattered over the layers of curds as they are placed in the moulds. This makes the bluish green streaks noticed in the cheese and helps to give Roquefort its aroma.

to give Roquefort its aroma. to give Roquefort its aroma.

The caves perform an important part in the fabrication of this cheese. It is largely by maturing and mellowing in them that Roquefort cheese is celebrated throughout the world for its delicate flavor and peculiar aroma. These caves are excavations, some natural and some artificial, hollowed out in the side of the steep and rocky mountain which dominates the little village clinging to its side. They are cold and damp, but ventilated by the air which penetrates through the fissures in the stratified rocks. Some caves are very large, measuring 57 metaves are very large, measuring 57 nssures in the stratified rocks. Some caves are very large, measuring 57 meters long by 9 meters wide and 14 meters high. There are several storeys in each cave containing shelves on which

sumes annually about 92,450 gallons of sheep's milk, from which is produced about 3,797 metric tons of cheese (metric ton, 2,20,6 pounds). This amount of milk is handled in some 360 dairies in the Aveyron and adjoining departments and the herds of sheep from which the supply is obtained are estimated at 600,000.

The milk must be pure unskimmed sheep's milk, unadulterated with water or with any other milk. Inspectors are employed and instruments used to detect fraud. The green hills of the Aveyron, which furnish fine pastures for feeding the sheep, play no small part in the quality of the milk and the celebrity of Roquefort cheese.

An average of 100 liters (1 liter, 1.0567 quarts) of sheep's milk will produce about 24 kilos (kilo, 2,2 pounds) of fresh cheese, whereas in the departments of the Rhone, the Puy-de-Dome and the cantal it requires 100 liters of cow's the cheese is placed.

the largest quantities of Roquefors cheese are the United States, Germany, Denmark, Sweden, Norway and Canada, which purchase more than \$2,000,000 worth annually. The United States is one of the best customers, the exportations thither in 1908 having reached \$104.518.

No less than 1,500 persons are employed in the Roquefort factories.—Daily Consular and Trade Reports.

SCRAP BOOK

TROUBLE IN THE PEDRO CLUB. indignation marked the meeting of the pedro club last week,
The women were so angry that they
scarce had power to spack;
D. it's plain a split is coming, ere anoth-

er month is o'er There will be two clubs, I'm certain, where one was known mility, And the cause of all the trouble is that Mrs. Graham claims
That Mrs. Schultz had goue outside and called her awful names.

When the meeting came to order Mia,
Graham took the floor,
And her face was white with anger, it
was plain that she was sore;
"Ive heard," she loudly shouted, "from a dear old friend of mine,
That Mrs. Schultz is hoping that I'm
going to resign;
And, furthermore, she stated that she
doesn't like my style,
That my house is always dirty, that I'm
gadding all the while."

I never did," cried Mrs. Schultz, "my

dears, that isn't so!"

"Keep still," said Mrs. Graham, "till I've
told you all I know:

"A friend of hers told Mrs. Paine, a "A friend of hers told Mrs. Pane, a neighbor on our street,
That Mrs. Schultz had told her that you women think I cheat,
And she said that with my husband I don't get along at all!"
Here she broke down altogether and began to loudly bawl.

"Shame! Shame!" cried Mrs. Graham's friends, whose tears fell like the

friends, whose tears fell like the rain,
"Hold on! Hold on!" the others cried,
"let Mrs. Schultz explain!"
"She can't explain," they answer made,
and then the fight began,
In fury friends of Mrs. Schultz replied:
"She can!"
And thus they squabbled back and forth
and made a great ado,
And if that club e'er meets again, 'twill
have to meet as two.
